

Attachment H - EPBC Act listed Migratory species with a moderate to high likelihood of occurrence and impact

Scientific Name	Common name	EPBC listing (if applicable)	Type of presence (inferred from PMST and/or VBA data visualisation)
<i>Actitis hypoleucos</i>	Common Sandpiper		Recent species records around wetland habitats within the AOI and to the north and south of the AOI, suggesting the species would cross the final alignment and further consideration of potential collision impact is required.
<i>Apus pacificus</i>	Fork-tailed Swift		Species or species habitat likely to occur within area. No recent records within the AOI or wider search area. Further consideration of habitat suitability required.
<i>Calidris acuminata</i>	Sharp-tailed Sandpiper		Species or species habitat known to occur within area. No recent records within the AOI or wider search area. Further consideration of habitat suitability required.
<i>Calidris canutus</i>	Red Knot	Endangered	Species or species habitat may occur within area. Recent records within coastal regions only and not within the AOI or other surrounding areas. Further consideration of habitat suitability required.
<i>Calidris ferruginea</i>	Curlew Sandpiper	Critically Endangered	Recent species records around wetland habitats within the AOI and to the south and east of the AOI, suggesting the species would cross the final alignment and further consideration of potential collision impact is required.
<i>Calidris melanotos</i>	Pectoral Sandpiper		Species or species habitat may occur within area. No recent records within the AOI or wider search area. Further consideration of habitat suitability required.
<i>Gallinago hardwickii</i>	Latham's Snipe		Species or species habitat may occur within area. No recent records within the AOI or wider search area. Further consideration of habitat suitability required.
<i>Hirundapus caudacutus</i>	White-throated Needletail	Vulnerable	Recent species records throughout the AOI and surrounding areas in all directions, suggesting the species would cross the final alignment and further consideration of potential collision impact is required.
<i>Monarcha melanopsis</i>	Black-faced Monarch		Species or species habitat likely to occur within area. Further consideration of habitat suitability required.
<i>Motacilla flava</i>	Yellow Wagtail		Species or species habitat may occur within area. Further consideration of habitat suitability required.
<i>Myiagra cyanoleuca</i>	Satin Flycatcher		Breeding known to occur within area. Further consideration of habitat suitability required.
<i>Numenius madagascariensis</i>	Eastern Curlew	Critically Endangered	Species or species habitat may occur within area. No recent records within the AOI or wider search area. Further consideration of habitat suitability required.
<i>Pandion haliaetus</i>	Osprey		Species or species habitat likely to occur within area. Further consideration of habitat suitability required.
<i>Rhipidura rufifrons</i>	Rufous Fantail		Species or species habitat known to occur within area.
<i>Tringa nebularia</i>	Common Greenshank		Recent species records around wetland habitats within the AOI and to the north and south of the AOI, suggesting the species would cross the final alignment and further consideration of potential collision impact is required.
