- 1. MEETING OPENING
- 1.1 Present & Apologies
- 2. DECLARATION OF CONFLICTS OF INTEREST
- 2.1 Conflicts of Interest
- 3. CONFIRMATION OF MINUTES
- 3.1 Confirmation of Minutes

Recommendation:

That the Place Making Advisory Committee confirm the minutes of the meeting held on Wednesday 15 February 2017.

4. INFRASTRUCTURE REPORTS

4.1 Draft Road Management Plan 2017 - 2021

Introduction

Author: Phil Jeffrey General Manager: Phil Jeffrey

Background

Moorabool Shire Council is a Road Authority as defined in Section 37 of the Road Management Act 2004 (RMA), and under this legislation, road authorities may choose to develop and publish a Road Management Plan (RMP).

The RMP is an operational document that provides road users with an overview of Council's road management policy and maintenance practices.

Specifically, the RMP and its associated asset registers define:

- the road assets which Council maintains on behalf of the community
- the responsibilities of Council in relation to management of road assets
- standards of performance in relation to the maintenance of road assets considering available resources
- policies and procedures in relation to the ongoing risk inspection of road assets
- intervention levels and associated response times for Council to address defects

Whilst the development of a RMP is optional, it is commonplace for Council's to have such a document in place as it is designed to:

- Meet the legislative requirements of the Act
- Mitigate risk and manage civil liability
- Demonstrate Council is responsibly managing road assets
- Define the hierarchy of road assets (roads, bridges and footpaths) and associated levels of service
- Manage community expectation in relation to required maintenance works

Under the Road Management (General) Regulations 2005, Council is required to undertake a review of its RMP every four years, in line with Council elections and the Council Plan. The amended RMP is required to be adopted by 30 June of the year following elections, in this instance 30 June 2017.

Moorabool adopted its first RMP in August 2004 in accordance the Act and Regulations. Subsequent reviews were undertaken and revised documents adopted by Council in 2009 and 2013.

Proposal

The Draft Road Management Plan has been reviewed using experience in implementation of Previous plans and using guidance from MAV insurance and associated audits undertaken periodically. The proposed changes to the document are summarised below.

Asset Classification and Hierarchy

A review of the various hierarchies relating to road asset types has been undertaken, which includes roads and paths. The review sought to achieve simplicity and consistency in relation to application of hierarchy and base it on traffic volume. The review also considered road hierarchies in the planning scheme and Infrastructure Design Manual to align the definitions in these documents.

Revised hierarchies and definitions have been developed and road assets have been reclassified within the updated hierarchy. Two new road hierarchies have been included acknowledging that unsealed roads have lower traffic volumes and deteriorate quickly and thus need to be monitored more frequently. In addition, urban and rural delineation still exists as it is considered that less frequent hazard inspections can occur in urban areas given the roads are generally constructed to a higher standard and have lower speed environments and hence lower risk. The proposed hierarchies are summarised in the table below and can be found in the draft RMP in Appendix B, Table B.1.

Category	Urban	Rural	AADT
Trunk Collector	Provides a strategic link between arterial roads, suburbs, commercial areas, major housing areas or a defined destination. Access to tourist facilities or industrial centres and may include regional links. These roads carry the heaviest volumes of traffic and the typical speed limit is between 50 to 80km/h. Is typically defined by Connector Street Level 2 in the Planning Scheme and IDM.	Provides a strategic link between, or to, defined townships, districts, tourist facilities, industrial centres and may include regional links. These roads may experience high use of heavy vehicles (e.g. trucks, busses, etc.).	>3000
Collector	Provides connection into residential areas. These roads carry heavy volumes of traffic and the typical speed limit is between 50 to 60km/h. Is typically defined by Connector Street Level 1 in the Planning Scheme and IDM.	Provides a connection between rural link and arterial roads carrying large volumes of traffic. These roads may typically cater for service and heavy vehicles as well and access to property.	1001-3000
Access L1	Medium to low traffic volume roads that provides access to local residents or secondary access to commercial areas. Typical speed limit is between 15 to 50km/h. Is typically defined by Access Street Level 1 and 2 in the Planning Scheme and IDM.	Medium to low traffic volume roads that provide access to local residents and property. Typical speed limit is between 50km/h to 100km/h.	201-1000
Access L2	Low traffic volume roads and cul de sacs that provides access and secondary access to access to local residents and property. Typical speed limit is between 15 to 50km/h. Is typically defined by Access Place and Access Lane in the Planning Scheme and IDM.	Low traffic volume roads that provides access to local residents and property. Typical speed limit is between 50km/h to 100km/h.	<200

Unsealed	Unsealed roads with a traffic	Unsealed roads with a traffic	>100
L1	volume greater than 100	volume greater than 100	
	vehicles/day that provides	vehicles/day that provides	
	access to local residents and	access to local residents and	
	property. Typical speed limit is	property. Typical speed limit is	
	between 15km/h to 60km/h.	between 50km/h to 100km/h.	
Unsealed	Low traffic volume unsealed	Low traffic volume unsealed	<100
L2	roads that provides access to	roads that provides access to	
	local residents and property.	local residents and property.	
	Typical speed limit is between	Typical speed limit is between	
	15km/h to 60km/h.	50km/h to 100km/h.	

Bridges have been removed from the document on advice from insurers and inspection and maintenance management of these will need to be developed as a separate document.

Register of Public Roads

Section 19 of the Road Management Act requires Council to keep a register of public roads, for which it is the 'Coordinating Road Authority'; and so Council should ensure that it has a complete and up to date register of public roads for which it is responsible. The Code of Practice indicates that this list can cover roads, roadways, pathways, road infrastructure or road related infrastructure.

To determine what roads should be included in the register, we need to conduct a thorough audit of roads in the municipality and clarify responsibilities for maintaining roads (check agreements with DSE, VicRoads, residents, adjoining municipalities etc.) Schedule 1 - RMA details the information that the public register must include:

- Name of the public road
- Date on which the road became a public road if declared after 1 July 2004
- The classification of the public road
- Reference to arrangements where management of road functions have transferred from one road authority to another.

Councils needs to be vigilant about new estates with new roads and paths being created. If these new developments aren't added to the roads register, then there is the risk that they won't be inspected. Roads that should not be included in the register are:

- Roads for which council is not the responsible road authority (e.g. another council or VicRoads);
- Private roads,
- Paper roads (e.g. roads that have been included on the register but do not exist or no longer exist or are unformed tracks not for public use etc.).

The Registers are annexed to the RMP but is kept separate due to the size of the register. At a minimum Council needs to provide reference in the RMP to where the register can be viewed by the public, as it is required to be available for inspection by the public, under section 19 of the RMA.

With the application of the proposed hierarchies, the table below summarises the changes in road lengths attributed to each proposed hierarchy.

Road Hierarchy	Road Length (Existing RMP)	Road Length (Proposed RMP)
Trunk Collector (Link)	105	13
Collector	105	29
Access Level 1	534	258

Access Level 2	147	584
Unsealed Level 1	144	18
Unsealed Level 2	402	528

<u>Technical Service Standards (Intervention Levels)</u>

The primary benefit of the RMP is to transparently establish proactive hazard inspection regimes for roads and footpaths with associated intervention levels and rectification response times. Critical aspects to be considered when setting these standards is that they are reasonable, they are achievable and that they address risk.

Inherent in the notion of reasonable is an acknowledgment that road authorities do not have unlimited resources or funds. Whilst aspiring to achieve better standards, the primary consideration is that Council sets reasonable standards and is able to meet those commitments.

This document sets the minimum standards for inspection and response times for all Council controlled road assets. The failure to have reasonable and achievable standards would be detrimental to Council's ability to mitigate risk and manage civil liability. Notwithstanding this, Council's operational teams, in many instances, achieve response standards significantly better than the minimum standards outlined in the document.

There are three main components to the technical service standards being inspection regimes, intervention levels and rectification response times.

1. Inspection Regime

In reviewing the existing RMP, a clearer inspection definition was sought and a risk-based approach was used taking into account factors such as traffic volume, traffic speed, urban/rural environments, typical construction standards, classification of the asset and type of road surface. The revised RMP now includes proactive and reactive inspection types only along with associated frequencies. Some frequencies have been adjusted based on hierarchy. The revised inspection regime can be found in Table B.2 and B.4 in the attachment.

2. Hazard Intervention Level & Response Time

The maintenance and repair standards must be achievable and realistic goals, not aspirational targets, and take into account industry standard, past experience, a risk based approach based on hierarchy and the physical and financial resources available to respond. Intervention levels must be clearly defined, and not open to different interpretations by staff when identifying defects.

The review of intervention levels and response times considered the above and responded to previous insurance audits. Numerous edits have been made however the biggest change is the removal of 'As Resources Permit' and replace with an actual timeframe. The revised intervention level and associated response time can be found in Table B.5 in the attachment.

Policy Implications

The 2013 - 2017 Council Plan provides as follows:

Key Result Area Enhanced Infrastructure and natural and built environment

Objective Management of assets and infrastructure

Strategy

Proactive maintenance of roads, bridges and footpaths at documented standards in the Road Management Plan

The proposal is consistent with the 2013-2017 Council Plan.

Financial Implications

The resource implications, if any, resulting from the amended categorisation of road assets or associated response timeframes can be accommodated within the existing operational budget.

There are no financial implications associated with commencing the public consultation process.

Risk & Occupational Health & Safety Issues

Risk Identifier	Detail of Risk	Risk Rating	Control/s
Legal – Civil	Civil liability risk to	Medium	Reasonable and
Liability	Council where it is		achievable
-	unable to achieve the		standards and
	commitments within its		timeframes outlined
	RMP		in Council's RMP

Communications and Consultation Strategy

The review of the Road Management Plan includes a proposed public consultation process including statutory requirements, as outlined below:

- Advertising in local newspapers and the Government Gazette, advising of Council's intention to update the RMP and how the community can make submissions to the draft version
- Advertising on 'Have Your Say Moorabool' as above
- Public exhibition period to allow for community comments for a period of 28 days
- All correspondence received would be documented and considered prior to a final draft version being presented to Council
- Media releases

Victorian Charter of Human Rights and Responsibilities Act 2006

In developing this report to Council, the officer considered whether the subject matter raised any human rights issues. In particular, whether the scope of any human right established by the Victorian Charter of Human Rights and Responsibilities is in any way limited, restricted or interfered with by the recommendations contained in the report. It is considered that the subject matter does not raise any human rights issues.

Officer's Declaration of Conflict of Interests

Under section 80C of the Local Government Act 1989 (as amended), officers providing advice to Council must disclose any interests, including the type of interest.

General Manager – Phil Jeffrey

In providing this advice to Council as the General Manager, I have no interests to disclose in this report.

Author – Phil Jeffrey

In providing this advice to Council as the Author, I have no interests to disclose in this report.

Conclusion

The RMP is an operational document that provides road users with an overview of Council's road management policy and maintenance practices.

Under the Road Management (General) Regulations 2005, Council is required to undertake a review of its RMP every four years, with the next draft version required to be adopted by Council by 30 June 2013.

The intent of this recommendation is to allow for public consultation to commence, considering the proposed changes to the draft RMP.

Recommendation:

That the Place Making Advisory Committee:

- 1. Receives the report in relation to the review of the 2013-17 Road Management Plan.
- 2. Requests that a report be presented to the April Ordinary Meeting of Council endorsing the following recommendation:

That Council:

- a. In accordance with the provisions of the Road Management (General) Regulations 2005, authorises the Chief Executive Officer to give public notice that the draft Road Management Plan 2017-2021 has been prepared and is available for public inspections.
- b. Resolves to allow 28 days for submissions to be made by members of the public.
- c. Requests a further report be presented to Council at the conclusion of the public consultation period considering all submissions received prior to formally completing its review of the Road Management Plan.

4.2 Maintenance of Unmade Government ("Paper") Roads Policy

Introduction

Author: John Miller General Manager: Phil Jeffrey

Background

Moorabool Shire Council has several hundred kilometres of Government ("Paper") Roads which are not maintained by Council throughout the Shire. "Paper road" is a term commonly used for a road that is legally established and recorded in survey plans, but has not been formally constructed. They typically comprise dirt tracks cleared by local farm vehicles. Such a road exists only on paper. None of these roads are included in Council's Register of Public Roads.

Approximately 44 kilometres of these Roads are classified as Fire Access Tracks and are only graded subject to advice from the Country Fire Authority and the list included in Council's Municipal Fire Management Plan.

Under Section 19(1) of the Road Management Act 2004, "A road authority must keep a register of public roads specifying the public roads in respect of which it is the coordinating road authority". For a road to be included in the register Council has to decide whether '... the road is reasonably required for general public use.....' Section 17(3).

Council is not obliged to assume responsibility for any Government ("Paper") Road until it has made a decision under the Act, that the road is reasonably required for general public use. This policy sets the criteria for when a road will be deemed required for general public use and subsequently added to Council's Register of Public Roads and managed and maintained accordingly.

The request for maintenance of 'paper roads' has recently become a topical issue as there are a number of properties being sold which abut these "Paper" Roads that do not require a Planning Permit as the lots have individual titles and as a result, houses are being constructed without access to a formal road.

At the Ordinary Meeting on 1 February 2017, Council considered a similar request for maintenance and resolved that officers prepare a policy on the development or maintenance of unused government ('paper') roads. The draft policy forms an attachment to this report.

Proposal

The draft Maintenance of Unmade Government ("Paper") Roads Policy proposes a number of criteria that would be required to be satisfied in order for Council to assume the management and maintenance of a 'paper' road. These criteria address the financial, environmental, and social impacts of upgrading and maintaining such roads.

It is proposed that the policy be presented to Council for consideration at the April Ordinary meeting, with a recommendation that the policy lay on the table as per Council's policy protocol.

Policy Implications

The 2013 - 2017 Council Plan provides as follows:

Key Result Area Enhanced infrastructure and natural and built environment

Objective Management of assets and infrastructure

Strategy Proactive maintenance of roads, bridges and footpaths at

documented standards in the Road Management Plan

The proposal is consistent with the 2013-2017 Council Plan.

Financial Implications

There are no financial implications associated with the adoption of this policy.

Risk & Occupational Health & Safety Issues

There are no risk or occupational health and safety issues associated with the adoption of this policy.

Communications and Consultation Strategy

The Maintenance of unmade Government "Paper") Roads Policy will be made available on Council's web site.

Victorian Charter of Human Rights and Responsibilities Act 2006

In developing this report to Council, the officer considered whether the subject matter raised any human rights issues. In particular, whether the scope of any human right established by the Victorian Charter of Human Rights and Responsibilities is in any way limited, restricted or interfered with by the recommendations contained in the report. It is considered that the subject matter does not raise any human rights issues.

Officer's Declaration of Conflict of Interests

Under section 80C of the Local Government Act 1989 (as amended), officers providing advice to Council must disclose any interests, including the type of interest.

General Manager – Phil Jeffrey

In providing this advice to Council as the General Manager, I have no interests to disclose in this report.

Author - John Miller

In providing this advice to Council as the Author, I have no interests to disclose in this report.

Conclusion

"Paper road" is a term commonly used for a road that is legally established and recorded in survey plans, but has not been formally constructed. They typically comprise dirt tracks cleared by local farm vehicles. Such a road exists only on paper. None of these roads are included in Council's Register of Public Roads.

Moorabool Shire Council has several hundred kilometres of Government ("Paper") Roads which are not maintained by Council throughout the Shire. The draft 'Maintenance of Unmade Government ('Paper') Roads Policy sets the criteria for when a road will be deemed required for general public use and subsequently added to Council's Register of Public Roads and managed and maintained accordingly.

Recommendation

That the Place Making Advisory Committee:

- 1. Received the draft IS017 Maintenance of Unmade Government ('Paper') Roads Policy; and
- 2. Requests that the policy be presented to the April Ordinary Meeting of Council endorsing the following recommendation:
 - a. That, in accordance with Moorabool Shire Council Policy Protocol, Consideration of Items which affect beyond the Current Year, the Maintenance of Unmade Government ('Paper') Roads Policy (IS017/Version 1) as attached, now lay on the table for further consideration at the next Ordinary Meeting of Council.

MEETING OPENING

Cr Keogh welcomed all and opened the meeting at 4.06pmpm.

ATTENDANCE

Cr John Keogh, Chair Councillor – East Moorabool Ward
Cr Tom Sullivan Councillor – West Moorabool Ward
Cr David Edwards (Proxy) Councillor – East Moorabool Ward

Mr Rob Croxford chief Executive Officer

Mr Phil Jeffrey General Manager Infrastructure
Mr John Miller Manager Asset Management

Mr Robert Fillisch Manager Statutory Planning & Community Safety Mr Andrew Goodsell Manager Strategic & Sustainable Development

Mr Justin Horne Co-ordinator Environmental Planning

Mr Rod Davidson Strategic Planning Officer

Ms Jacquie Elliott Minute Taker

APOLOGIES

Mr Satwinder Sandhu General Manager Growth & Development

Cr Paul Tatchell Councillor – Central Ward

CONFLICTS OF INTEREST

No conflicts of interest were declared at the meeting.

CONFIRMATION OF MINUTES

Recommendation:

That the Place Making Advisory Committee confirm the minutes of the meeting held on Wednesday 14 December 2016.

Moved: Cr Sullivan Seconded: Cr Keogh

CARRIED

INFRASTRUCTURE REPORTS

4.1 Request for Maintenance; Cathcart Street, Clarendon

Resolution:

That the Place Making Advisory Committee:

- 1. Receives the report in relation to Cathcart Street 'paper road'.
- 2. Requests that the report be presented to Council endorsing the following recommendation:
 - a) That Cathcart Street not be added to the Register for Public Roads until upgrades are undertaken in accordance with Council standards.
 - b) Requests officers to write to property owners along Cathcart Street 'paper road' proposing the implementation of a Special Charge Scheme.
 - c) Acknowledge that the public and property owners are legally permitted to use this road reserve (ie. Cathcart Street 'paper road') to access property.

Moved: Cr Sullivan Seconded: Cr Edwards

CARRIED

GROWTH & DEVELOPMENT REPORTS

5.1 Sustainable Environment Strategy

Resolution:

That the Place Making Advisory Committee:

- 1. Note the submissions and amendments as proposed in the draft Moorabool Sustainable Environment Strategy; and
- 2. Support a report being presented to the April Ordinary Meeting of Council for adoption of the subject strategy.

Moved: Cr Sullivan Seconded: Cr Edwards

CARRIED

5.2 Flood Modelling Peer Review

Resolution:

That the Place Making Advisory Committee:

- 1. Receives this report.
- 2. Advise Melbourne Water that, for a rigorous and independent peer review of existing flood modelling undertaken by Melbourne Water, it would be optimal for Council to choose the preferred consultant with funding via Melbourne Water.
- 3. Resolve that the findings of the peer review process be tabled at the Place Making Committee, once completed, and then be tabled at an Ordinary Meeting of Council.
- 4. Resolve that, upon tabling the peer review and upon addressing any identified concerns with the modelling data and processes in accordance with an agreed methodology, Council should proceed with seeking authorisation to prepare and exhibit an appropriate new

planning scheme amendment to map and address flood risk within the eastern half of the Shire.

Moved: Cr Edwards Seconded: Cr Sullivan

CARRIED

5.3 Parking of Heavy Vehicles

Recommendation:

That the Place Making Advisory Committee receives the Parking of Heavy and Long Vehicles report.

Resolution:

- 1. That the Place Making Advisory Committee receives the Parking of Heavy and Long Vehicles report.
- 2. That Officers provide a further report to the Place Making Advisory Committee on opportunities for parking locations within Bacchus Marsh for Heavy and Long Vehicles.

Moved: Cr Sullivan Seconded: Cr Edwards

4.0	Moorabool Shire Council	

Executive Summary

Moorabool Shire Council is a Road Authority as defined in Section 37 of the Road Management Act 2004. Council's Road Management Plan has been developed to meet the legislative requirements of the Road Management Act 2004 and the strategic directions adopted by the Moorabool Shire Council.

The Road Management Plan identifies responsibilities, maintenance standards and inspection regimes required to manage civil liability as well as demonstrate that Council, as the road authority, is responsibly managing all the road assets under its control.

Reference is also made to other key Council policies and strategies and consideration is given to these to ensure that the plan is consistent with the adopted strategic directions.

The Road Management Plan is seen as a dynamic document and the plan and associated registers will be formally reviewed and refined on an ongoing basis to ensure that Moorabool Shire can continue to demonstrate that it is responsibly managing its road assets.

The Road Management Plan will be reviewed and updated every four years and the road register and footpath register will be reviewed and updated annually.

Although it is not a legal requirement, it is Council's intention, where appropriate, to apply the standards developed for the Road Management Plan across the off road path network.

SECTION 1 Introduction

Purpose of the Road Management Plan

This document addresses the requirements of a Road Management Plan as defined by the Road Management Act 2004, and in doing so provides road users and the community with an overview of road management policy and practices of Moorabool Shire Council.

Specifically, the Road Management Plan defines:

- the road assets which Council maintains on behalf of the community
- the responsibilities of Council in relation to management of road assets
- standards of performance in relation to the condition of road assets which Council can afford
- policies and procedures in relation to the ongoing risk inspection of road assets
- intervention levels and associated response times for Council to address road asset defects identified in its risk inspections

Relationship with Legislation

The Road Management Plan has been prepared pursuant to the requirement of the following legislation:

- Road Management Act 2004
- Road Management (General) Regulations 2005
- Road Management (Works and Infrastructure) Regulations 2005

In addition to the Road Management Act, Council's road management responsibilities are impacted by a wide variety of federal and state legislation, including:

- Victorian Local Government Act 1989
- Victorian Road Safety Act 1986
- Victorian Planning and Environment Act 1987
- Victorian Occupational Health and Safety Act 2004
- Federal Disability Discrimination Act 1992

Relationship with Other Strategic & Operational Documents

The Road Management Plan is a key component of Council's planning and asset management process.

Figure 1 below illustrates the relationship between the Road Management Plan and other strategic asset and operational documents of Council.

Council Plan Asset Management Policy Other policies, strategies and plans Asset Management Strategy Service Level Asset Long Term Agreements. Management Financial Plan Plans Capital Works Annual Budget and Maintenance Program **Programs**

Figure 1. Relationship between Road Management Plan and Other Corporate Documents/Processes

Road Management Act 2004

The purpose of the Road Management Act is to enable the coordinated management of public roads that will promote safe and efficient State and local public road networks and the responsible use of road reserves for other legitimate purposes.

The Road Management Act sets out the powers and duties of the Road Authority to manage roads and to install and maintain infrastructure. The Act also provides a policy defence to Road Authorities where they can demonstrate responsible management, based on available resources, through an adopted Road Management Plan.

The Road Management Act provides for the making of Codes of Practice to provide practical guidance in relation to road management. The Government has issued a number of such Codes addressing such issues as:

- the physical limits of operational responsibility between VicRoads and municipal councils with regard to declared freeways and arterial roads
- the responsibilities of Councils and Utility Companies with respect to management of all infrastructure within the road reserve
- guidance for road authorities in the making of a road management plan for the inspection, maintenance and repair of public roads
- guidance on maintaining worksite safety and providing for the management of traffic through worksites

Obligation of Road Users

Even though Council has a responsibility for maintenance of roads under the Road management Act, road users also have a responsibility when driving on public roads. Section 17A of the Road Safety Act 1986 (as amended by the Road Management Act) sets out road users' obligations and these are summarised below.

- A person who drives a motor vehicle on a highway must drive in a safe manner having regard to all the relevant factors including (but not limited to) the:
 - a) physical characteristics of the road
 - b) prevailing weather conditions
 - c) level of visibility
 - d) condition of the motor vehicle
 - e) prevailing traffic conditions
 - f) relevant road laws and advisory signs
 - g) physical and mental condition of the driver
- A road user other than a person driving a motor vehicle must use a highway in a safe manner having regard to all the relevant factors. A road user must have regard to the rights of other road users and the community, taking reasonable care to avoid conduct that may:
 - a) endanger the safety and welfare of other road users
 - b) damage the infrastructure on the road reserve
 - c) harm the environment of the road reserve
- For cyclists and pedestrians, the duty includes keeping a proper lookout and being responsible for their own safety.

Scope

This Plan covers all roads and road related areas for which the Council is responsible, as defined in the Council's Register of Public Roads and Register of Footpaths. Assets covered include:

- Road formation and wearing course (seal, asphalt or gravel)
- On-road car parking
- Off-street Council owned car parks
- Traffic control equipment (traffic islands, line marking and signage)
- Kerb, channel or spoon drain associated with a road or footpath
- Footpaths, bicycle paths and shared pathways constructed by Council
- Road drainage, including table drains
- Off road path networks (this is included in the registers but is not a legal requirement)

The Road Management Act excludes a number of road related facilities from the statutory requirements, and hence from the coverage of a Road Management Plan:

- Road reserves which are not on the register of Public Roads (typically these are 'paper roads', road reserves which exist on title but have not been constructed)
- Street trees, whether or not planted by Council

- Private carparks
- Nature strips in urban areas
- Verges, outside the limit of road works on rural roads
- Driveways providing access to a public road from adjoining land
- Culverts under driveways
- Any stormwater pit, pipe or structure
- Gas pipes, water and sewerage pipes, telecommunication and other cables, electricity poles and cables, rail infrastructure (including level crossings), bus shelters, mail boxes, roadside furniture and fences erected by utilities.

Availability of the Plan

The plan is available at the following locations and may be viewed free of charge by the public, during the hours of 8.30am and 5.00pm on each business day. The plan is also available to download from Council's website www.moorabool.vic.gov.au.

SECTION 2

Moorabool Shire's Roads

Moorabool Shire's Road

Moorabool Shire provides a road network covering over 1,440km. Assets that form part of this network include the road formation and surface, bridges and culverts, paths, roadside drainage and traffic control. Collectively these assets have a current total replacement value of \$321M.

Figure 2. Road Hierarchy

Register of Public Roads

Moorabool Shire, pursuant to the requirements of the Road Management Act 2004 is the 'coordinating road authority' for all municipal roads within the municipality. The road and footpath registers define the roads and footpaths for which Council is the responsible authority. Council has determined that the roads and footpaths on the Register of Public Roads are those that are considered to be reasonably required for public use.

The register provides details of all roads for which Council is the responsible authority, including:

- Road name
- Locality

- Starting point (datum) and length
- Hierarchy
- Demarcation responsibility
- Details of ancillary areas

The registers are updated regularly and are available for inspection at the Council's service centres in Bacchus Marsh and Ballan, as well as on the Council's Website.

There are numerous road and tracks within Moorabool Shire that Council is not responsible for, but are managed by other road authorities such as VicRoads, the Department of Sustainability and Environment and the various Catchment Management Authorities. A small number of private roads are the responsibility of the respective owners corporations. In particular, the majority of roads and tracks through State Forests are not the responsibility of Moorabool Shire.

Most car parks associated with shopping centres within the Shire are the responsibility of the complex owners. Those that are Council responsibility are identified in the Register of Public Roads.

Criteria for determining whether a road is reasonably required for public use

Moorabool Shire has developed a policy for determining whether any section of road is 'reasonably required for general public use' and should therefore be included on Council's Register of Public Roads. The policy outlines the criteria that must be met, in order for road sections to be included on the register and also how Council address the management of unformed or unmade roads.

A copy of the Maintenance of Unmade Government ('Paper') Roads Policy is available on Council's website www.moorabool.vic.gov.au.

Demarcation of Responsibility

Demarcation Agreements

Moorabool Shire is bounded by seven municipalities as listed below. The boundary is often the centreline of a road, or follows a watercourse over which bridges or culverts have been constructed. Council has agreements with neighbouring municipalities for boundary roads regarding operational and maintenance responsibility to clearly assign maintenance responsibilities to one or other of the authorities. The agreement also identifies capital works responsibilities.

VicRoads also has an agreement with Moorabool Shire that defines the maintenance responsibilities on main roads owned by VicRoads. In general, on roads with 100km/hr posted speed limits, VicRoads is responsible from fence to fence, but in urban areas and areas under 80km/hr, VicRoads is responsible for the road pavement, kerb and/or table drain whilst Moorabool maintains the road reserve and footpaths. Responsibilities for main roads are set out in the Code of Practice for Operational Responsibility, issued under the Road Management Act 2004.

Council has also signed a Safety Interface Agreement (SIA) with VLine and VicTrack as required under the Rail Safety Act 2009. The SIA specifies the respective maintenance responsibilities for roads, bridges and pathways in the vicinity of any level crossing. Generally, the rail authority is responsible for all level crossings and the road pavement 3m either side, and Council is responsible for signage and linemarking on the approaches.

The following table details the relationship and agreements between Moorabool Shire and adjacent authorities. Of the 62km of boundary roads, Moorabool is responsible for maintaining approximately 50%, whilst the other Councils share the responsibility for the remainder.

NAME	AUTHORITY	AGREEMENT	DOCUMENT IN PLACE
Golden Plains Shire Council	Local Government	Maintenance of boundary roads by Moorabool Shire Maintenance of boundary roads by Golden Plains Shire Maintenance of 1 bridge by Golden Plains Shire	Yes
City of Ballarat	Local Government	Maintenance of boundary roads by Moorabool Shire Maintenance of boundary roads by City of Ballarat	Yes
Hepburn Shire Council	Local Government	Maintenance of boundary roads by Moorabool Shire Maintenance of boundary roads by Hepburn Shire Council.	Yes
City of Melton	Local Government	Maintenance of boundary roads by Moorabool Shire Maintenance of boundary roads by City of Melton	Yes
City of Greater Geelong	Local Government	Maintenance of boundary roads by Moorabool Shire Maintenance of boundary roads by City of Greater Geelong Maintenance of 3 bridges by City of Greater Geelong	Yes
Macedon Ranges Shire Council	Local Government	No boundary roads between Moorabool Shire and Macedon Ranges Shire	N/A
Wyndham City	Local Government	Maintenance of boundary roads by Moorabool Shire 50% of associated costs paid by Wyndham City	Yes
VicRoads	Main Roads Authority	VicRoads is the responsible authority for main roads as per the Code of Practice – Operational Responsibility for Public Roads. Maintenance of full road reserve in 'rural' areas by VicRoads. Maintenance of road pavement, kerb and/or table drain in 'urban' areas by VicRoads. Maintenance of road reserves and footpaths in 'urban' areas by Moorabool Shire.	Yes

V/Line	Rail	Level crossings and road pavement 3.0m either side of rail tracks maintained by V/Line. Road and	Yes
		furniture maintenance on approached to level crossings by Moorabool Shire. Bridges as per SIA.	

Paper Roads

'Paper road' is a term commonly used for a road that is legally established and recorded in survey plans, but has not been formally constructed. They typically comprise dirt tracks cleared by local farm vehicles. Such a road exists only on paper. Within Moorabool Shire, there are several hundred kilometres of such roads. None of these roads are included on the Register of Public Roads.

A policy has been developed addressing the management of unused 'paper roads'. A copy of the Maintenance of Unmade Government ('Paper') Roads Policy is available on Council's website www.moorabool.vic.gov.au.

Private Access Roads

There are diverse access tracks, which may or may not lie within a road reserve, which give access only to one or two properties. Such access tracks have the characteristic of a private driveway and are regarded as such by Council. Such access tracks are not on the Register of Public Roads and Council does not undertake maintenance of them.

Council's Maintenance of Unmade Government ('Paper') Roads Policy also addresses the management of such roads and is available on Council's website www.moorabool.vic.gov.au.

Other Assets in the Road Reserve

A number of authorities make use of the road reserve for the installation of infrastructure associated with their services. These include water and sewerage utilities, power, gas and telecommunications utilities. The Council does not maintain these assets. The respective authorities have a responsibility under the Road Management Act and specifically under the Code of Practice for Management of Infrastructure in Road Reserves to maintain their infrastructure in a satisfactory state of repair.

Vehicle Crossovers (Driveways)

Vehicle crossovers provide access from a public road to a private property, from the road edge to the property line (boundary/fence). Crossovers are the landowner's responsibility, are constructed at the property owner's expense and must be carried out to the Council's standards, subject to a permit. Where modifications to the Council's assets (e.g. paths and kerb and channel) are required as part of the installation of a new driveway, these shall be at the landowner's expense. The property owner is responsible for ensuring the driveway, including the immediate surrounds that the driveway impacts on, are maintained in a safe condition.

In an urban situation, the Council retains management responsibility for any footpaths and kerb and channel, while the landowner has management responsibility for the remainder of the crossover even

though it is within the road reserve. Where there is no footpath or kerb and channel, the landowner is responsible for the entire crossover from road edge to property line.

In rural areas where there is no footpath or kerb and channel, the landowner is responsible for the entire driveway, from the edge of shoulder or edge of pavement to the property boundary, including any culverts and endwalls that may be required for roadside drainage under the driveway. Any work to be carried out within the road reserve must be carried out to Council Standards.

Maintenance of Naturestrip or Road Verge

The nature strip is that part of the road reserve between the edge of the road and the adjoining property, but excludes any road shoulder, footpath, bicycle path or shared path. Generally, it is the expectation that the resident or occupier will maintain the nature strip adjoining their property. Normally this is by regular mowing, weeding and picking up litter. Council only carries out maintenance of nature strips at town entrances and high profile areas. Council also undertakes rural roadside slashing along strategic fire breaks.

If the nature strip becomes damaged following service authority works, such as water, gas, electricity, telecommunications works or as a result of building works, the service authority or builder is responsible for nature strip repairs and reinstatement. Council is responsible for street trees planted on the nature strip.

SECTION 3

Levels of Service

Asset Hierarchy

All assets are classified according to a hierarchy that considers the specific function, types of users and user numbers. Service levels (including inspection frequency, intervention levels and maintenance frequency) are largely based on the respective asset hierarchies. The hierarchy classification is used to assist in prioritising inspection, intervention responses and works. Appendices B and C show the Council's hierarchical classification of roads and pathways, along with simplified definitions.

Service Levels for Road Assets

A level of service is the defined service quality for a particular activity or service area (e.g. roads, footpaths or drains) against which service performance can be measured. Levels of service typically relate to quality, reliability, responsiveness, accessibility and cost. Levels of Service must be meaningful and address the issues customers believe to be important.

The community levels of service in this plan are outlined below and have been developed from:

- The Council's goals and strategies
- Knowledge of key issues regarding road infrastructure
- Standards and legislative requirements
- Management of risk
- Available resources (funding levels, staffing, asset capacity)
- Customer expectations (based on customer requests, surveys, Councillor feedback etc.)

The technical levels of service are the operational or technical measures that are utilised in providing the service. These are detailed within the appendices of the RMP.

CHARACTERISTICS	LEVEL OF SERVICE	LEVEL OF SERVICE	
	Road Network	Footpath & Trail Network	
Ease of travel	Roads are well maintained and the network is functional allowing for ease of travel for all types of traffic.	The footpath and trail network is maintained according to the hierarchy.	
Safety	The road network is safe and trafficable in all weather conditions, day and night.	The footpath and trail network is safe and trafficable for all users according to the hierarchy.	

Cleanliness	Roads are kept clean and associated drainage is unrestricted by rubbish.	The walking, jogging and cycling network is kept clean.
Responsiveness	Enquiries and requests are responded to in a timely manner.	Enquiries and requests are responded to in a timely manner.
Legislative compliance	To ensure that all roads meet relevant legislative requirements and Acts.	To ensure that all walking, jogging and cycling paths meet relevant legislative requirements and Acts.

Key Stakeholders

The following key customer groups of the Moorabool Shires Road Assets have been identified:

- The local community (ratepayers, rural community groups, business community, commercial and business interests, schools, developers)
- Road users (motorists and passengers, transport industry, pedestrians, cyclists, disadvantaged users including the elderly, mobility scooters)
- Emergency services, Road Safety Authority, VicRoads
- Utility providers (water supply, wastewater, public transport, communications and energy)
- Special interest groups (RACV, Access Inclusion)

Customer Expectations

Wherever practicable, input will be sought by way of stakeholder engagement. It is important that any decisions are made on the basis of what is deemed to be in the best interest of the community overall while not unreasonably disadvantaging specific groups.

The Council consults on all significant road projects and undertakes an annual community survey to determine community views by engaging independent consultants to carry out Community Satisfaction Surveys each year. Levels of Service described herein aim take into account perceived short comings in customer service.

Level of Service Review

The level of service will be reviewed at least every four years in conjunction with the review of Road Asset Management Plan and Road Management Plan. This review includes a period of community consultation.

SECTION 4

Management Tactics

Operations & Maintenance Tactics

Reactive and programmed inspections are carried out on the Moorabool road network to identify required remedial work. These inspections are carried out at frequencies outlined in Appendices B and C.

Reactive maintenance tasks are primarily identified through customer requests and are documented in Council's Customer Request Management System (CRMS). These tasks are assessed and responded to according to Council's service standards.

Council maintains a 24-hour callout service, and emergency issues can be actioned accordingly assuming there are not multiple emergencies. Programmed maintenance tasks are identified by a continuous inspection regime, documented and then recorded in a data base. All recorded defects are ranked and work orders generated for action within a works schedule.

Routine maintenance is carried out according to scheduled works programs. Maintenance budgets are fixed at the start of each year, and routine maintenance schedules may be adjusted depending on the amount of reactive or emergency maintenance required in any one year. The amount of emergency work required due to storms, floods etc. will influence the quantity of routine maintenance work that is completed in any period. Pavement condition assessments are carried out on the entire network every three to five years to prioritise renewal programs.

Managing Risk

The Moorabool Shire has a risk policy and assessment framework based on AS/NZS ISO 31000:2009 to document known risks and develop management strategies to priorities and mitigate risks for Council work activities and capital projects.

Council uses methodology that incorporates both reactive and programmed inspections and has documented inspection frequencies, intervention levels and response periods that are designed to minimise and manage the overall risk rating. Specific intervention levels and response periods determined by this process are shown in Appendices B and C.

To help mitigate risk to Council, there is generally a three step process in place as follows:

Inspect the Asset

Identify what is outside intervention level

mplement appropriate action with required response time

The overall Road Management Process is listed in Appendix A.

Noting that there are over 1,440 kilometres of road with several thousand intersections, approximately 105 bridges and 160 kilometres of footpath, the risk assessment and intervention responses have been developed on a broad scale. The risk process takes into account accident history and severity, contributing factors, and resources available.

Council investigates all reported footpath tripping/falling incidents. Specific sites identified with a recurring accident trend are assessed for suitability for remedial treatment under a range of Federal, State and Local Government funding programs.

Audit & Review Process

The General Manager Infrastructure undertakes 6 monthly and ad hoc audits of performance against the standards set out in this Road Management Plan. The results of the audits are provided to the General Manager Infrastructure, identifying non-compliances and management actions in order to address non-conformances.

In addition, the Council's insurers audit the process periodically to verify that Council has a system to inspect and maintain its assets, recording these activities, and retrieving these records.

The Road Management Plan is subject to a full review by all Infrastructure Managers every 4 years, coinciding with Council elections. The revised Plan is then submitted to Council for adoption.

Duty to Inform Service Provider or Infrastructure Manager

If, in the course of meeting its obligations under this Plan, the Shire becomes aware that any non-road infrastructure for which a service provider or works and infrastructure manager is responsible is any of the following, the Shire will convey that information to the relevant service provider or works and infrastructure manager:

- not in the location shown in the relevant records
- appears to be in an unsafe condition
- appears to be in need of repair or maintenance

Service Authorities with assets within the road reserve include:

- Water Authority (sewer pits, trenches, pipes, water supply valves and underground lines)
- Gas (pits and trenches)
- VicTrack (rail tracks, crossings and signage used by both pedestrians and vehicles)
- Telstra (poles, overhead cables, pits and trenches, underground lines)
- Power (poles, overhead electric cables, pits and trenches)
- VicRoads (state road pavements, surfaces, kerb and channel)

Events Beyond the Control of Council

Council will make every endeavour to meet all aspects of its Road Management Plan. However, in the event of natural disasters or multiple emergency events, as well as human factors (such as but not limited to lack of Council staff or suitably qualified contractors), because of Section 83 of the Victorian

Wrongs Act, 1958, as amended, Council reserves the right to suspend compliance with this Road Management Plan.

In the event that the Chief Executive Officer (CEO) of the Council, pursuant to Section 83 of the said Act, has to consider the limited financial resources of Council and its other conflicting priorities, and determines that Council's Road Management Plan provisions cannot be met, the CEO will advise Council's officer in charge of its Plan and advise that some or all of the timeframes and responses in Council's Plan are to be suspended.

Once the events beyond the control of Council have abated, or if the events have partly abated, Council's Chief Executive Officer will advise the Council's officer responsible for Council's Plan and advise which parts of Council's Plan are to be reactivated and when.

Emergency Response & Temporary Repair

Emergency response are works that need to be undertaken outside the routine works programs to ensure the safety of road users and the public as a result of an emergency incident. Emergency works include traffic incident management, response to fires, floods, storms and chemical spillages, and assistance under the Municipal Emergency Management Plan.

Temporary works are undertaken to reduce the risk of an incident until such time as routine maintenance can be completed. Response times and measures (warning signs, flashing lights, speed reduction, safety barriers) are typically as soon as practicable and is determined based on the risk to safety and the type, volume and nature of road usage.

SECTION 5

Reviewing the Plan

Plan Review

A formal review, in accordance with sections 303 and 304 of the Road Management (General) Regulations 2005, will be conducted every four years in line with Council elections and the road register, and footpath register will be reviewed and updated at least annually.

Amendment of the Road Management Plan

Unless required as a result of a significant change in budget allocations for road and footpath maintenance this Road Management Plan will not be amended during the life of the Plan. Any revision of the Plan would be subject to the consultation and approval processes as detailed in Section 54 of the Road Management Act.

Delegation

The General Manager Infrastructure is empowered under delegation to amend any of the Appendices attached to this plan and to periodically change and update the Register of Public Roads. Reporting on the changes shall be in accordance with the powers of delegation.

SECTION 6

References

Supporting Documents & Technical References

The following supporting documents and technical references, whilst complimenting the Plan **do not form** part of this Plan. All supporting documents may change from time to time to reflect changes in Council policy, legislative changes, operational changes or as a result of audit findings. Supporting documents are not available for inspection but most may be downloaded from the relevant State Government, Council or organisation web sites.

Table B.1 Road Hierarchy Definitions

CODE	CATEGORY	DESCRIPTION (urban)	DESCRIPTION (rural)	ANNUAL AVERAGE DAILY TRAFFIC (AADT)
тс	Trunk Collector	Provides a strategic link between arterial roads, suburbs, commercial areas, major housing areas or a defined destination. Access to tourist facilities or industrial centres and may include regional links. These roads carry the heaviest volumes of traffic and the typical speed limit is between 50 to 80km/h. Is typically defined by Connector Street Level 2 in the Planning Scheme and the IDM.	Provides a strategic link between, or to, defined townships, districts, tourist facilities, industrial centres and may include regional links. These roads may experience high use of heavy vehicles (e.g. trucks, busses, etc.).	> 3,000
С	Collector	Provides connection into residential areas. These roads carry heavy volumes of traffic and the typical speed limit is between 50 to 60km/h. Is typically defined by Connector Street Level 1 in the Planning Scheme and the IDM.	Provides a connection between rural link and arterial roads carrying large volumes of traffic. These roads may typically cater for service and heavy vehicles as well and access to property.	1,001 – 3,000
A1	Access Level 1	Medium to low traffic volume roads that provides access to local residents or secondary access to commercial areas. Typical speed limit is between 15 to 50km/h. Is typically defined by Access Street Level 1 and 2 in the Planning Scheme and the IDM.	Medium to low traffic volume roads that provide access to local residents and property. Typical speed limit is between 50km/h to 100km/h.	201 – 1,000
A2	Access Level 2	Low traffic volume roads and cul de sacs that provides access and secondary access to access to local residents and property. Typical speed limit is between 15 to 50km/h. Is typically defined by Access Place and Access Lane in the Planning Scheme and the IDM.	Low traffic volume roads that provides access to local residents and property. Typical speed limit is between 50km/h to 100km/h.	< 200
U1	Unsealed Level 1	Unsealed roads with a traffic volume greater than 100 vehicles/day that provides access to local residents and property. Typical speed limit is between 15km/h to 60km/h.	Unsealed roads with a traffic volume greater than 100 vehicles/day that provides access to local residents and property. Typical speed limit is between 50km/h to 100km/h.	> 100
U2	Unsealed Level 2	Low traffic volume unsealed roads that provides access to local residents and property. Typical speed limit is between 15km/h to 60km/h.	Low traffic volume unsealed roads that provides access to local residents and property. Typical speed limit is between 50km/h to 100km/h.	< 100

Table B.2 Pathway Hierarchy Definitions

CATEGORY CODE	CATEGORY	DESCRIPTION
P1	High Use & Commercial Areas	These are footpaths serving the retail and commercial ares of town centres (eg. Main Street, Bacchus Marsh and Inglis Street, Ballan). Also, footpaths that serve other medium density pedestrian attractors such as those within the first blosk away from major commercial areas, or those in close proximity to schools, railways stations or other pedestrian generators.
P2	Medium Use	Footpaths and shared paths which link to railway stations, bus stops, local shops, churches, schools, senior citizens centres and hostels, or other pedestrian generators. Typically they will be along Trunk Collector and Collector roads. This category also includes footpaths around or serving Council's corporate buildings (offices, works depots, child care centres etc).
Р3	Low Use	Footpaths constructed as access within residential areas that link to higher level paths. Typically these will be along Access Level 1 and Access Level 2 roads. This category also includes all sealed (asphalt, bitumen or concrete) rural footpaths in rural areas and in townships other than Ballan and Bacchus Marsh.
P4	Recreational Trails (Urban & Rural)	These include recreation or exercise walking tracks, typically linking the residential areas with reserves, river banks or other scenic areas, or are paths within recreation reserves or unformed tracks used by hikers. They often have unsealed surfaces or are without major modification to the ground. These tracks are typically utilised in warmer weather.

Table B.3 Road Inspection Types & Frequency

		INSPECTIONFREQUENCY (by road category) D = weekday, M = month, Y = year						
INSPE	ECTION TYPE	TC	С	A1	A2	U1	U2	
PROACTIVE	Urban	Not exceeding 3M	Not exceeding 6M	Not exceeding 12M	Not exceeding 12M	Not exceeding 6M	Not exceeding 6M	
PROA	Rural	Not exceeding 3M	Not exceeding 3M	Not exceeding 6M	Not exceeding 6M	Not exceeding 3M	Not exceeding 6M	
REACTIVE	Interim inspection as a result of notification or Customer Request	Not exceeding 3D	Not exceeding 5D	Not exceeding 5D	Not exceeding 10D	Not exceeding 10D	Not exceeding 10D	

Proactive Inspection

These inspections assess the road for the presence of defects that have reached the intervention level as defined in Table B.3. Programmed inspections must be recorded for all road assets regardless of the identification of a defect or not. A visual inspection from a vehicle is undertaken for roads, and on foot for paths, in order to identify defects.

Reactive Inspection

These are undertaken following notification to council of defects and safety issues. The inspection involves an assessment of the reported defect to determine if it has reached intervention level as defined in Table B.3 and to determine whether a maintenance response is required.

Inspection Frequency

This is the frequency of inspections to identify defects. The nominated time is not precise and a 10% margin is allowable. Where the required frequency would result in the inspection falling on a day other than a weekday (any day other than Saturday or Sunday, or a Public Holiday), the inspection may be undertaken on the first following weekday.

Table B.4 Pathway Inspection Types & Frequency

		INSPECTIONFREQUENCY (by path category) D = weekday, M = month, Y = year						
INSPE	CTION TYPE	P1	P2	Р3	P4			
PROACTIVE	Programmed hazard and maintenance inspection	Not exceeding 6M	Not exceeding 12M	Not exceeding 12M	Not exceeding 12M

INSPECTION TYPE (PATHS)	P1	P2	Р3	P4
FOOTPATHS & SHARED USER PATHS				
Sealed paths and shared paths having a vertical step >25mm.	1M	2M	6M	6M
Shared paths with line of sight blockages by vegetation, encroachment by grass, or loose surface.	1M	2M	6M	6M
Unsealed paths and shared paths having a vertical step >50mm.	-	2M	6M	12M
Vegetation clearance <2m in height, unless signed otherwise, over a pedestrian/bicycle path, or protruding over the path edge.	3M	6M	12M	12M

Response Time

This is the time allowed to respond to a hazard, which is based on consideration of the hazard type and severity. Response time is measured from the time that the hazard is identified by, or notified to, Moorabool Shire Council. The nominated time is not precise and a 10% margin is allowable.

Appropriate Warning

Where, because of the nature of the work required, level of resources required or workload, it is not feasible to rectify a hazard within the time shown within Table B.3, appropriate warning of the hazard is to be provided until a suitable repair or treatment can be completed. Appropriate warning may include, but is not limited to the following:

- Provision of warning signage
- Traffic control action
- Diverting traffic around the site
- Installation of temporary speed limits
- Lane closures
- Closure of the road to use by certain vehicles (eg. a load limit)
- Road closures

15 Stead Street, Ballan VIC 3342 P: 03 5366 7100

> Version 4.0 March 2017

ATTACHMENT 4.1; Draft Maintenance of Unmade Roads Policy

Infrastructure Policy (Assets)

Policy No.:	IS017	
Review Date:	2021(or as required)	IS017 - Maintenance of
Revision No.:	00	Unmade Government
Expiry Date:	N/A	("Paper") Roads Policy
Version No.:	01	(raper) Roads rolley
Adopted by:	Executive Group	
Responsible Officer:	General Manager Infrastructure	

1. Introduction

Moorabool Shire Council has several hundred kilometres of Government ("Paper") Roads which are not maintained by Council throughout the Shire. 'Paper road' is a term commonly used for a road that is legally established and recorded in survey plans, but has not been formally constructed. They typically comprise dirt tracks cleared by local farm vehicles. Such a road exists only on paper. None of these roads are included in Council's Register of Public Roads.

Approximately 44 kilometres of these Roads are classified as Fire Access Tracks and are only graded subject to advice from the Country Fire Authority and the list included in Council's Municipal Fire Management Plan.

Under Section 19(1) of the Road Management Act 2004, "A road authority must keep a register of public roads specifying the public roads in respect of which it is the coordinating road authority". For a road to be included in the register Council has to decide whether '... the road is reasonably required for general public use.....' Section 17(3).

Council is not obliged to assume responsibility for any Government ("Paper") Road until it has made a decision under the Act, that the road is reasonably required for general public use. This policy sets the criteria for when a road will be deemed required for general public use and subsequently added to Council's Register of Public Roads and managed and maintained accordingly.

2. Purpose of the Policy

The aim of this policy is to establish a framework for making consistent, structured and justifiable decisions as to whether a road or area of land is reasonably required for general public use and is therefore considered to be a "public road" for the purpose of including it in Council's Register. The inclusion in the register of a public roads is an acknowledgement by Council that it is the coordinating road authority in respect of the road or area of land, and therefore has the responsibility for its on-going maintenance and the risk associated with this function.

3. Policy Objectives

The objectives of this policy are to specify the criteria for the expansion of Councils existing road network in relation to Government ("Paper") Roads by addressing:

- a) The economic impact
- b) The environmental impact
- c) The social impact
- d) The responsibility for maintenance of Government ('paper') roads
- e) The upgrading of Government ('paper') roads by land owners

f) Requests for maintenance or upgrade of Government ('paper') roads

4. Policy

Should a landowner require access via a Government ("Paper") Road, Council expects that the landowner will provide that access at their cost. This puts them in the same situation as a developer who has to upgrade roads at their cost as part of a new subdivision.

Council may consider an application to contribute to upgrade an unmaintained road to Council's standard and take over maintenance responsibilities, subject to allocation of funding in its Long Term Capital Improvement Program and annual budget, and with consideration to other conditions stipulated below.

Economic Impact

The level of funding available to Council to undertake required level of maintenance and rehabilitation/renewal is a major constraint. Taking over the responsibility for upgrading and maintaining more roads currently not maintained by Council will require additional funds and the benefits to affected land owners need to be balanced against wider community benefits, reduction in service levels of the Council maintained roads and reduced financial sustainability.

Environmental Impact

Upgrading Government "Paper" roads to current standards will have an impact on existing trees, habitat and biodiversity, as most of these roads are in rural areas and have vegetation encroachments along the road reserves. In many cases, these unmaintained road reserves represent the last remnants of undisturbed natural vegetation in the area.

Social Impact

Road maintenance is an area where Council has to manage limited funds to maintain the entire road network. It is often mentioned by residents living on Government ("Paper") roads about the rates they pay. It is important to ensure road maintenance expenditure is managed equitably based on the functional hierarchy of the network and to ensure optimal community benefits are achieved.

Responsibility for Maintenance of Government ('Paper') Roads

Council is not obliged to assume responsibility for any Government ("Paper") Road until it has made a decision under the Road Management Act 2004, that the road is reasonably required for general public use. Council only maintains the roads that are included in Council's Register of Public Roads. Approximately 1430km of roads have been listed in the Road Register in 2016/17. Maintained Roads have been constructed by Council or by another party to Council standards and formally handed to and accepted by Council.

The cost of maintenance of Government ("Paper") Roads are the responsibility of the land owners who use the road for access to private properties.

Where access is only for a single property, the property owners may also choose to upgrade the section of road to a standard lower than Council would accept (akin to a driveway) to access their property at their cost and maintenance responsibility.

Upgrading Government ('Paper') Roads by Landowners

Council will accept written applications to construct a formed road by the applicants. Applications will be assessed and may be granted conditional approval based on conditions outlined in the policy.

Conditions and standards of construction will be as per the Infrastructure Design Manual (IDM) and relevant development guidelines.

The formation/construction of a road to Council standards does not automatically imply that Council will maintain the road. Council as a rule will only take over maintenance of the road, if it provides wider community benefits and satisfies the conditions outlined under Requests for maintenance below.

Following construction of the road in accordance with conditional approval and its acceptance by the authorised Council officer, Council may assume responsibility for its maintenance, subjected to conditions stated in this Policy.

Requests for Maintenance or Upgrade of Government ('Paper') Roads

Council may consider applications on an individual basis and on merits to upgrade an existing Government ("Paper") Road to Council standard, and take over its maintenance and subsequent management responsibilities subject to availability of funds and where the following conditions must be met:

- The road must be a public road (it should be noted that roads which are public roads (or public highways) are not necessarily going to be deemed to be "reasonably required for public use" and therefore will not necessarily be included on Council's Register of Public Roads.
- Acceptance of a Special Charge Scheme (A Special Rates and Charges Scheme could be initiated to construct the road with contributions from land owners and Council would subsequently assume ownership and maintenance responsibility for that section of additional road) by the residents
- The Road provides primary access to at least one full time occupied residence (ie. the property owner is otherwise land locked and without any frontage road).
- The Road is named and signed
- The Road has previously been constructed by or regularly maintained by Council
- The Road Contains assets owned and maintained by public service authorities (eg. Gas, Electricity, Telecommunications, Sewerage and Water)
- The construction of the Road provides clear benefit to several property owners (not just one)
- The Road is required for fire access purposes
- The Road connects into and forms part of the wider network of public roads
- The Road Is fenced on both sides
- The Road has a minimum traffic count of 40 vehicles per day (average)

5. Related Legislation, Policies & Guidelines

External:

- Land Act 1958
- Forests Act 1958
- National Parks Act 1975
- Crown Land (Reserves) Act 1978
- Subdivision Act 1988
- Local Government Act 1989
- Road Management Act 2004

Internal:

Special Rates and Charges Policy

6. Implementation

This policy will be implemented through the following activities:

- a) Communicated to all staff will be involved in providing information related to development, use and maintenance of roads.
- b) The policy will be placed on Council's website.

7. Definitions

Public Highway	Any area of land that is a highway for the purposes of the common law (All Government Roads are Public Highways)
Maintained Road	A road that has been constructed to Council approval and is included in Council's Register of Public Roads and maintained in accordance with it Road Management Plan.
Government 'Paper' Road	'Paper road' is a term commonly used for a road that is legally established and recorded in survey plans, but has not been formally constructed. They typically comprise dirt tracks cleared by local farm vehicles. Such a road exists only on paper. Within Moorabool Shire, there are several hundred kilometres of such 'paper roads'. None of these roads are included in the Register of Public Roads.
Private Access Roads	There are diverse access tracks, which may or may not lie within a Government Road Reserve, which give access only to one or two farms. Such access tracks have the characteristic of a private driveway and are regarded as such by Council and are not on the Register of Public Roads and Council does not undertake maintenance of them, this responsibility lies with the owner of the property accessing the track. In addition, a small number of constructed roads within the Shire are private roads owned and managed by the body corporate of a
	subdivision. Council is not responsible for these roads and they are not included in the Register of Public Roads.
Fire Access Tracks	These are formed or unformed tracks which have been identified specifically to provide emergency access for CFA vehicles in the event of bush fires. At or just prior to the start of each fire season, Council in collaboration with the CFA and DELWP will determine the priority for and standard of maintenance to be undertaken on any given fire access track.

8. Review

This policy will be reviewed in 2021, or sooner if there is a requirement due to changes to related policies, procedures or legislation.
