VERSION	ADOPTED BY	DATE ADOPTED
1.0	Moorabool Shire Council	August 2004
2.0	Moorabool Shire Council	September 2009
3.0	Moorabool Shire Council	June 2013
4.0	Moorabool Shire Council	June 2017
5.0	Moorabool Shire Council	June 2021
6.0	Moorabool Shire Council	August 2025

Definitions

Arterial Road	Refers to freeways, highways and declared main roads, which are managed by the Victorian Government, through Head Transport for Victoria (as the co-ordinating road authority).
Co-ordinating road authority	The organisation which has the responsibility to co-ordinate works. Generally, if the road is a freeway or arterial road, this will be Head Transport for Victoria. Generally, if the road is a municipal road, this will be Council.
Council	Refers to the Moorabool Shire Council
Demarcation agreement	A formal agreement between Council and another organisation that defines areas of responsibility.
Motor vehicle	Refers to a vehicle that is propelled by an in-built motor and is intended to be used on a roadway. This does not include a motorised wheelchair or mobility scooter which is incapable of travelling at a speed greater than 10 km/h and is solely used for the conveyance of an injured or disabled person.
Municipal road(s)	Road for which the municipal council is the co-ordinating road authority. The Road Management Act 2004 imposes specific duties on the municipal council with respect to the inspection, repair and maintenance of these roads and associated road-related infrastructure.
Non-road infrastructure	Refers to infrastructure in, on, under or over a road, which is not road infrastructure. This includes (but is not limited to) such items as gas pipes, water and sewerage pipes, cables, electricity poles and cables, rail infrastructure, bus shelters, public telephones, mail boxes, roadside furniture and fences erected by utilities, or providers of public transport.
Other roads	Include roads in state forests and reserves, and roads on private property. Municipal councils are not responsible for the inspection, repair or maintenance of these roads.
Pathway	Refers to a footpath, bicycle path, shared path or other area that is constructed or developed by Council for members of the public (not motor vehicles) to use.
Plan	Refers to this Road Management Plan.
Public Road	As defined by the Road Management Act 2004 and includes a freeway, an arterial road, a municipal road declared under section 14(1) of the Act and a road in respect of which Council has made a decision that it is reasonably required for general public use and is included on the Register of Public Roads.
Road	Has the same meaning as in the Road Management Act 2004, being inclusive of any public highway, any ancillary area and any land declared to be a road under section 11 of that Act or forming part of a public highway or ancillary area.

Road infrastructure	Refers to infrastructure which forms part of a roadway, pathway or shoulder, which includes structures and materials.
Road-related infrastructure	Refers to infrastructure installed or constructed by the relevant road authority to either facilitate the operation or use of the roadway or pathway, or support or protect the roadway or pathway.
Road Management Act 2020	The purpose of the Road Management Act is to guide the coordinated management of public roads that will promote safe and efficient state and local public road networks and the responsible use of road reserves for other legitimate purposes.
Road Reserve	Refers to the area of land that is within the boundaries of a road. Example: any nature strip, forest, bushland, grassland or landscaped area within the road reserve would be roadside.
Roadside	Refers to any land that is within the boundaries of the road (other than shoulders) which is not a roadway or pathway. This includes land on which any vehicle crossing or pathway, which connects from a roadway or pathway on a road to other land, has been constructed. Example: any nature strip, forest, bushland, grassland or landscaped area within the road reserve would be roadside
Roadway	Refers to the area of a public road that is open to, or used by, the public, and has been developed by a road authority for the driving or riding of motor vehicles. This does not include a driveway providing access to a public road, or other road, from adjoining land.
Shoulder	Refers to the cleared area, whether constructed or not, that adjoins a roadway to provide clearance between the roadway and roadside. This does not refer to any area that is not in the road reserve.

Executive Summary

Moorabool Shire Council is a Road Authority as defined in Section 37 of the Road Management Act 2004. Council's Road Management Plan has been developed to meet the legislative requirements of the Road Management Act 2004 and the strategic directions adopted by the Moorabool Shire Council.

The Road Management Plan identifies responsibilities, maintenance standards and inspection regimes required to demonstrate that Council, as the road authority, is responsibly managing all the road assets under its control as well as manage civil liability.

Reference is also made to other key Council policies and strategies, and consideration is given to these to ensure that the plan is consistent with the adopted strategic directions.

The Road Management Plan is seen as a dynamic document and the plan and associated registers will be formally reviewed and refined on an ongoing basis to ensure that Moorabool Shire can continue to demonstrate that it is responsibly managing its road assets.

The Road Management Plan will be reviewed and updated every four years and the road register and footpath register updated on an ongoing basis.

Although it is not a legal requirement, it is Council's intention, where appropriate, to apply the standards developed for the Road Management Plan across the off-road path network (eg. roads or paths within reserves).

INTRODUCTION

1 Purpose of the Road Management Plan

This document addresses the requirements of a Road Management Plan as defined by the Road Management Act 2004, and in doing so provides road users and the community with an overview of road management policy and practices of Moorabool Shire Council.

Section 50 of the Road Management Act 2004 sets the following objectives for a municipal road management plan:

1) To establish a system for our road management functions, which is based on policy, operational objectives and available resources.
2) To set a performance standard for our road management functions.

Specifically, the Road Management Plan defines:

- the road assets (roads and paths) which Council maintains on behalf of the community.
- the responsibilities of Council in relation to management of road assets.
- standards of performance in relation to the maintenance of road assets which Council can afford.
- policies and procedures in relation to the ongoing risk inspection of road assets.
- intervention levels and associated response times for Council to address road defects identified in its risk inspections.

Scope

This Plan covers all roads and road related areas for which the Council is responsible, as defined in the Council's Register of Public Roads and Register of Footpaths.

Assets covered include:

- Road formation and wearing course (seal, asphalt or gravel)
- On-road car parking
- Off-street Council owned car parks
- Traffic control devices (traffic islands, line marking and signage)
- Kerb channel or spoon drains associated with a road or footpath
- Footpaths, bicycle paths and shared pathways
- Road drainage, including table drains
- Roads and/or paths within reserves (although not a legal requirement, these are included in the public registers)

The Road Management Act excludes a number of road related facilities from the statutory requirements, and hence from the coverage of a Road Management Plan:

- Road reserves which are not on the register of Public Roads (typically these are termed 'paper roads', being road reserves which exist on title but have not been physically constructed).
- Street trees, whether or not planted by Council.
- Private carparks.
- Nature strips in urban areas.
- Verges, outside the limit of road works on rural roads.
- Driveways providing access to a public road from adjoining land.
- Culverts under driveways (including endwalls).
- Any stormwater pit, pipe or structure.
- Gas pipes, water and sewerage pipes, telecommunication and other cables, electricity poles and cables, rail infrastructure (including level crossings), bus shelters, mail boxes, roadside furniture and fences erected by utilities.
- Road and pedestrian bridges.

Relationship with Legislation

The Road Management Plan has been prepared pursuant to the requirement of the following legislation:

- Road Management Act 2004.
- Road Management (General) Regulations 2016.
- Road Management (Works and Infrastructure) Regulations 2015.

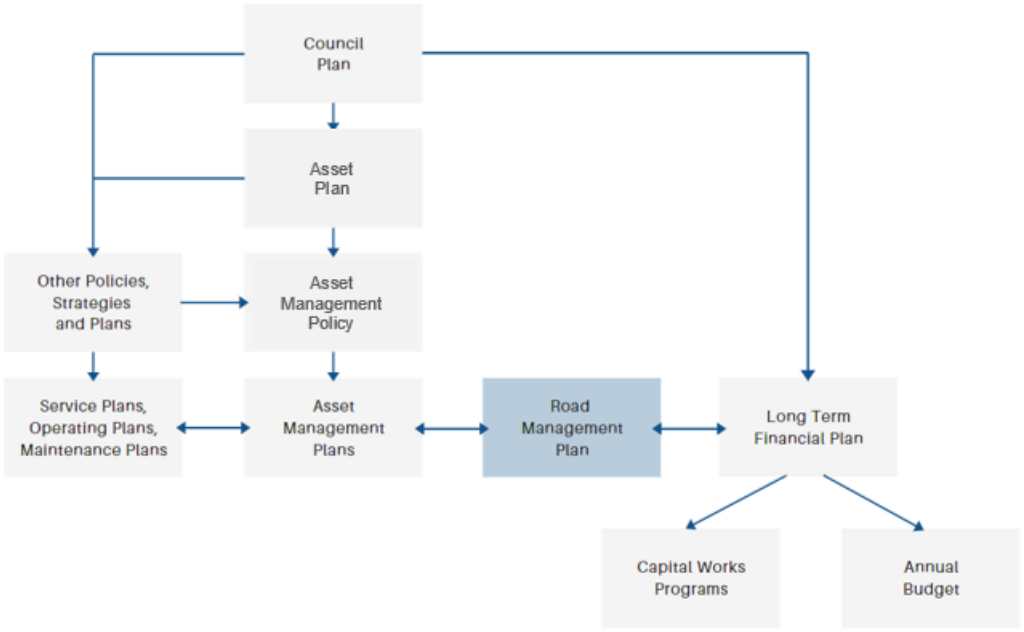
In addition to the Road Management Act, Councils road management responsibilities are impacted by a wide variety of federal and state legislation, including:

- Victorian Local Government Act 2020.
- Victorian Road Safety Act 1986.
- Victorian Planning and Environment Act 1987.
- Victorian Occupational Health and Safety Act 2004.
- Federal Disability Discrimination Act 1992.
- Wrongs Act 1958.

Relationship with Other Strategic & Operational Documents

The Road Management Plan is a key component of Council's planning and asset management process.

Figure 1. illustrates the relationship between the Road Management Plan and other strategic and operational documents of Council.



Road Management Act 2004

The purpose of the Road Management Act is to guide the coordinated management of public roads that will promote safe and efficient state and local public road networks and the responsible use of road reserves for other legitimate purposes.

The Road Management Act sets out the powers and duties of the Road Authority to install, manage and maintain road infrastructure. The Act also provides a policy defence to Road Authorities where they can demonstrate responsible management, based on available resources, through an adopted Road Management Plan.

The Road Management Act provides for the making of Codes of Practice to provide practical guidance in relation to road management. The Government has issued several relevant Codes addressing such issues as:

- the physical limits of operational responsibility between the Department of Transport (DoT) and municipal Councils with regard to declared freeways and arterial roads;
- the responsibilities of Councils and utility companies with respect to management of all infrastructure within the road reserve;
- guidance for road authorities in the making of a road management plan for the inspection, maintenance and repair of public roads; and
- guidance on maintaining worksite safety and providing for the management of traffic through worksites.

Coordinating & Responsible Road Authority

Section 35 of the Road Management Act 2004 provides that a road authority has power to do all things necessary or convenient to be done for or in connection with the performance of its functions under the Act.

Section 36 of the Road Management Act 2004 outlines which road authority is the coordinating road authority. According to subsection (c), the coordinating road authority is:

> "If the road is a municipal road, the municipal Council of the municipal district in which the road or part of the road is situated."

However, there are instances where several authorities are responsible for components of the road within the road reserve. Section 37 of the Road Management Act 2004 identifies who is the responsible road authority in particular circumstances.

Public Roads

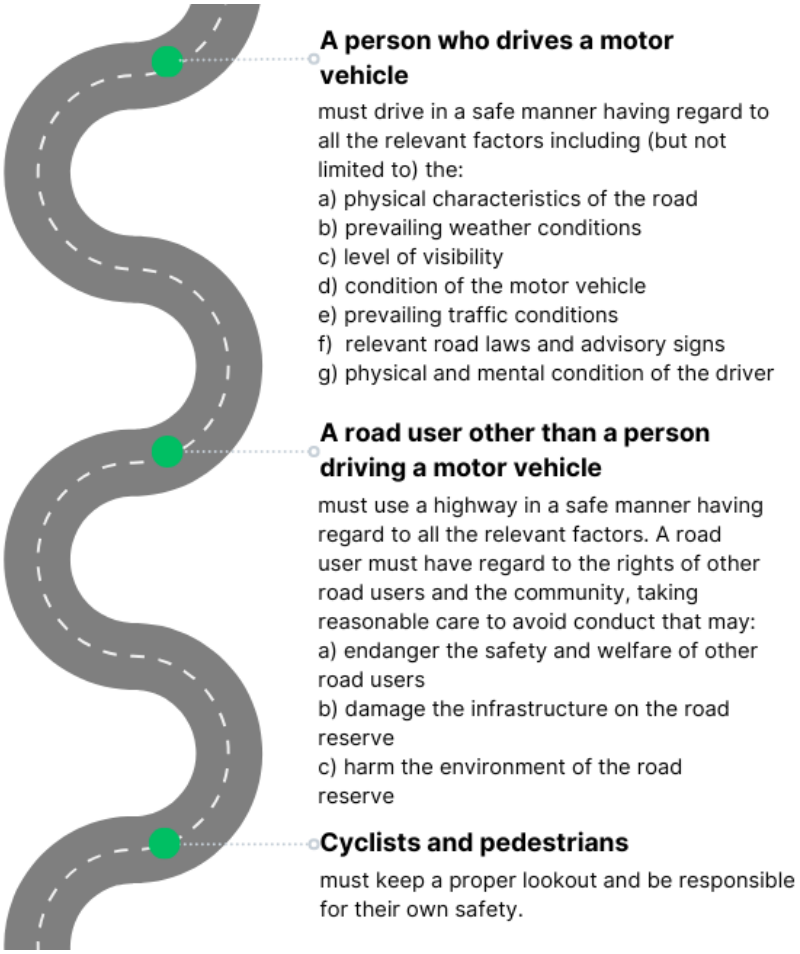
Public roads are defined in the Road Management Act 2004 as including:

- a freeway;
- an arterial road;
- a road declared under section 204(1) of the Local Government Act 1989;
- a municipal road declared under section 14(1) of the Road Management Act 2004; and
- a road in respect of which Council has made a decision that it is reasonably required for general public use and is included on the Register of Public Roads.

Obligation of Road Users

Even though Council has a responsibility for maintenance of roads under the Road Management Act, road users also have a responsibility when driving on public roads.

Section 17A of the Road Safety Act 1986 (as amended by the Road Management Act) sets out road users' obligations and these are summarised below.



A person who drives a motor vehicle

must drive in a safe manner having regard to all the relevant factors including (but not limited to) the:

a) physical characteristics of the road
b) prevailing weather conditions
c) level of visibility
d) condition of the motor vehicle
e) prevailing traffic conditions
f) relevant road laws and advisory signs
g) physical and mental condition of the driver

A road user other than a person driving a motor vehicle

must use a highway in a safe manner having regard to all the relevant factors. A road user must have regard to the rights of other road users and the community, taking reasonable care to avoid conduct that may:

a) endanger the safety and welfare of other road users
b) damage the infrastructure on the road reserve
c) harm the environment of the road reserve

Cyclists and pedestrians

must keep a proper lookout and be responsible for their own safety.

Availability of the Plan

The Road Management Plan and associated registers are available on Council's website www.moorabool.vic.gov.au.

MOORABOOL SHIRE'S ROADS AND PATHS

2 Road and Path Network

Moorabool Shire provides a road network covering over 1,463km.

Assets that form part of this network include the road formation and surface, bridges and culverts, paths, roadside drainage and traffic control.

Moorabool Shire provides a path network covering over 236km.

Table 1 – Road length by hierarchy – as of March 2025:

Hierarchy	Length (km)	% of Network
Collector - Urban	23.3km	1.6%
Collector – Rural	120.8km	8.3%
Access Level 1 – Urban	63.6km	4.3%
Access Level 1 – Rural	239.2km	16.3%
Access Level 2 – Urban	107.4km	7.3%
Access Level 2 – Rural	366.5km	25.1%
Unsealed – Urban	14.3km	1%
Unsealed – Rural	528.4km	36.1%
Total	**1463.5km**	**100%**

Table 2 – Road Length by Surface Type – as of March 2025:

Surface Type	Length (km)	% of Network
Sealed	920.7km	62.9%
Unsealed	542.8km	37.1%
Total	**1463.5km**	**100%**

Table 3 – Footpath length by hierarchy – as of March 2025:

Hierarchy	Length (km)	% of Network
P1	13.9km	5.8%
P2	27.8km	11.7%
P3	161.4km	68.4%
P4	33.4km	14.1%
Total	**236.5km**	**100%**

Table 4 – Footpath Length by Surface Type – as of March 2025:

Surface Type	Length (km)	% of Network
Sealed	211km	89.3%
Unsealed	25.5km	10.7%
Total	**236.5km**	100%

Register of Public Roads

Pursuant to the requirements of the Road Management Act 2004, Moorabool Shire Council is the 'coordinating road authority' for all municipal roads within the municipality.

The road and footpath registers define the roads and footpaths for which Council is the responsible authority. Council has determined that the roads and footpaths on the Register of Public Roads are those that are considered to be reasonably required for public use.

The registers are updated regularly and are available on the Council's website.

There are numerous road and tracks within Moorabool Shire that Council is not responsible for but are managed by other road authorities such as the Department of Transport, the Department of Environment, Land, Water & Planning and the various Catchment Management Authorities. In particular, the majority of roads and tracks through State Forests are not the responsibility of Moorabool Shire. A small number of private roads are the responsibility of the respective owners' corporations.

Most car parks associated with shopping centres within the Shire are the responsibility of the complex owners. Those that are Council responsibility are identified in the Register of Public Roads.

Roads not listed on the Register

The following roads are not listed on our Register of Public Roads:

- Roads which are the full responsibility of the state government, or a private enterprise;
- Unused roads for which we have not accepted responsibility;
- Roads drawn out on a plan of subdivision, until such time that we accept responsibility for these roads;
- Roads which we have not determined are reasonably required for general public use.

Criteria for determining whether a road is reasonably required for public use

Moorabool Shire has developed a policy for determining whether any section of road is 'reasonably required for general public use' and should therefore be considered for inclusion on Council's Register of Public Roads.

The policy outlines the criteria that must be met, in order for sections of road to be included on the register and also how Council addresses the management and maintenance of unmade roads.

A copy of the Management & Maintenance of Unmade 'Paper' Roads Policy is available on Council's website www.moorabool.vic.gov.au.

Demarcation of Responsibility

Demarcation Agreements

Moorabool Shire is bounded by seven municipalities. The boundary is often the centreline of a road or follows a watercourse over which bridges or culverts have been constructed.

Council has agreements with neighbouring municipalities for boundary roads regarding operational and maintenance responsibility to clearly assign maintenance responsibilities to one or other of the authorities. The agreement also identifies capital works responsibilities.

DoT also has an agreement with Moorabool Shire that defines the maintenance responsibilities on main roads owned by the department. In general, on roads with 100km/hr posted speed limits, DoT is responsible from fence to fence, but in urban areas and areas under 80km/hr, DoT is responsible for the road pavement, kerb and/or table drain whilst Moorabool maintains the road reserve and footpaths. Responsibilities for main roads are set out in the Code of Practice for Operational Responsibility, issued under the Road Management Act 2004.

Council has also signed a Safety Interface Agreement (SIA) with VLine, VicTrack and the Department of Transports as required under the Rail Safety Act 2009. The SIA specifies the respective maintenance responsibilities for roads, bridges and pathways in the vicinity of any level crossing. Generally, the rail authority is responsible for all level crossings and the road pavement 3m either side, and Council is responsible for signage and linemarking on the approaches.

Of the 62km of boundary roads, Moorabool is responsible for maintaining approximately 50%, whilst the other Councils share the responsibility for the remainder.

Current Agreements:

- Golden Plains Shire Council;
- City of Ballarat;
- Hepburn Shire Council;
- City of Melton;
- City of Greater Geelong;
- Macedon Ranges Shire Council;
- Wyndham City Council;
- Department of Transport (Operational Responsibility for Public Roads); and
- VLine/VicTrack/Department of Transport (Rail Safety Interface Agreement).

Paper Roads

'Paper road' is a term commonly used for a road that is legally established (ie. a designated road reservation is recorded in survey plans) but the physical road has not formally been constructed.

Paper roads typically comprise a natural surface cleared typically for access to property and formed only with a worn path from local vehicle usage. Paper roads are not uncommon, with several hundred kilometres throughout the Shire. Although the public have the right to access these road reservations at any time, they are not included on Council's Register of Public Roads and as such, are not managed or maintained by Council.

A policy has been developed addressing the management of unused 'paper roads'. A copy of the Management & Maintenance of Unmade 'Paper' Roads Policy is available on Council's website www.moorabool.vic.gov.au.

Private Access Roads

These are tracks that may provide access to land parcels and have the characteristic of a private driveway.

In addition, a small number of constructed roads within the Shire are private roads owned and managed by an owner's corporation. Council is not responsible for these roads, and they are not included in the Register of Public Roads.

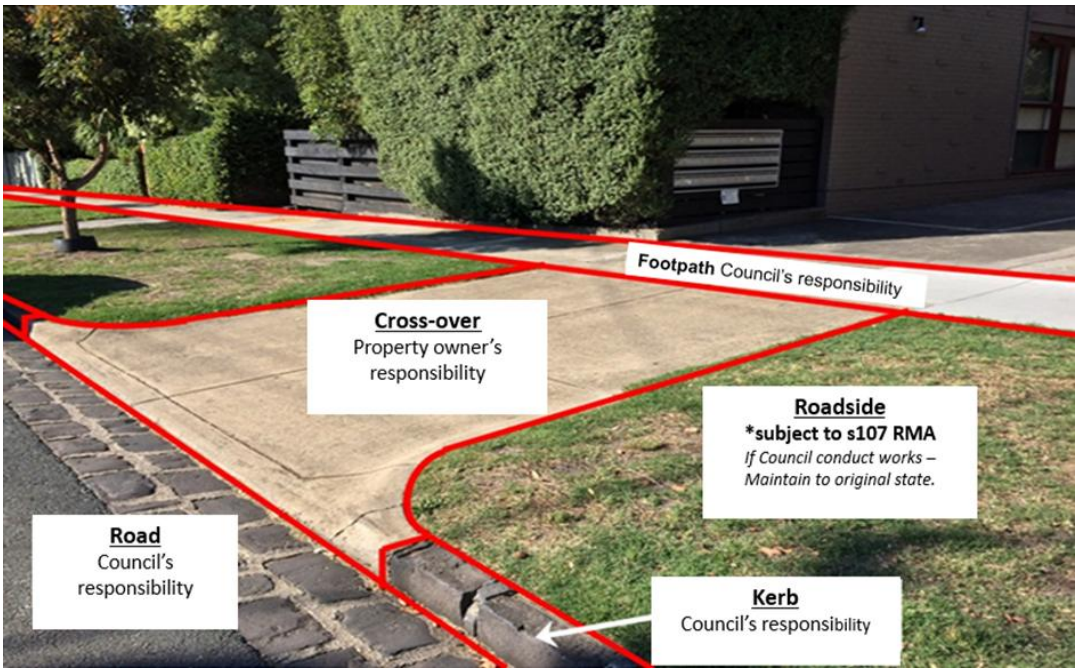
Vehicle Crossovers (Driveways)

Vehicle crossovers provide access from a public road to a private property, from the road edge to the property line (boundary/fence).

Crossovers are the landowner's responsibility, are constructed at the property owner's expense and must be carried out to the Council's standards, subject to a permit. Where modifications to the Council's assets (e.g. paths and kerb and channel) are required as part of the installation of a new driveway, these shall be at the landowner's expense. The property owner is responsible for ensuring the driveway, including the immediate surrounds that the driveway impacts on, are maintained in a safe condition.

In an urban situation, the Council retains management responsibility for any footpaths and kerb and channel, while the landowner has management responsibility for the remainder of the crossover even though it is within the road reserve. Where there is no footpath or kerb and channel, the landowner is responsible for the entire crossover from road edge to property line.

In rural areas where there is no footpath or kerb and channel, the landowner is responsible for the entire driveway, from the edge of shoulder or edge of pavement to the property boundary, including any culverts and endwalls that may be required for roadside drainage under the driveway. Any work to be carried out within the road reserve must be carried out to Council Standards.



Non-Road Infrastructure

There are several assets within the road reserve that Council do not have an obligation to inspect and/or maintain. This includes (but is not limited to):

- Gas pipes, water and sewerage pipes, cables, electricity poles and cables, rail infrastructure, bus shelters, public telephones, mailboxes, roadside furniture and fences erected by utilities, or providers of public transport.
- Single property stormwater drains constructed within the reserve that carry water from a single property to an outlet in the kerb, or other drain.
- Utilities including, but not limited to; telecommunication, power, water, gas and rail authority assets.
- Roadsides as per Section 107 of the Road Management Act, Council has no "*statutory duty or a common law duty to perform road management functions in respect of a public highway which is not a public road or to maintain, inspect or repair the roadside*", described as *"any land that is within the boundaries of the road (other than shoulders) which is not a roadway or pathway"*. This includes landscaped tree plots within the footpath/pathway where the surface of the tree plot is not constructed with the intention of providing a trafficable pedestrian surface.

Other Assets in the Road Reserve

A number of authorities make use of the road reserve for the installation of infrastructure associated with their services.

These include water and sewerage utilities, power, gas and telecommunications utilities. The Council does not maintain these assets. The respective authorities have a responsibility under the Road Management Act and specifically under the Code of Practice for Management of Infrastructure in Road Reserves to maintain their infrastructure in a satisfactory state of repair.

Where Council becomes aware of a hazard created by the defective condition of assets/infrastructure owned by another party, Council may at its absolute discretion:

- If located within assets/infrastructure for which Council is responsible (e.g. footpaths, road surfaces, etc.), or otherwise presents an immediate and significant risk to members of the public, undertake temporary measures to reduce the risk to members of the public until such time as the respective owner can implement permanent repairs (subject also to Council's available resources)
- Report in writing (e.g. email or letter) the presence of the hazard to the responsible party and request that repairs be implemented within a reasonable timeframe.
- Where repairs are not completed by the responsible party within the respective timeframe, Council may complete necessary repairs and invoice the responsible party for the costs.

However, where another party has a duty in relation to the asset/infrastructure, and Council has a discretionary power to take remedial action in relation to that matter, only that other party with the duty is liable in a subsequent proceeding, in accordance with s.104 of the Road Management Act 2004.

Maintenance of Naturestrip or Road Verge

The nature strip is the part of the road reserve between the edge of the road and the adjoining property, but excludes any road shoulder, footpath, bicycle path or shared path.

Generally, and in accordance with Council's Local Law, it is the expectation that the resident or occupier of a property in a residential area, will maintain the nature strip adjoining their property in a neat and tidy condition. Normally this is by regular mowing, weeding and picking up litter. Council only carries out maintenance of nature strips at town entrances and high-profile areas. Council also undertakes rural roadside slashing along strategic fire breaks.

If the nature strip becomes damaged following service authority works, such as water, gas, electricity, telecommunications works or as a result of building works, the service authority or builder is responsible for nature strip repairs and reinstatement. Council is responsible for street trees planted on the nature strip.

Incident Claims

If a person proposes to make a claim in relation to a public road or infrastructure for which Council is the responsible road authority, that person should contact Council and Council will initiative respective investigation and insurance reporting processes.

In accordance with Section 110 of the Road Management Act 2004, Council is not legally liable for property damages where the value of the damage is equal to or less than the threshold amount.

In cases where the claim relates to assets Council does not own or is not responsible for on the road reserve, the person who proposes to make a claim must refer the claim to the other authority or person responsible for those assets.

Permits for work within a road reserve

In cases where an individual or organisation proposes to carry out works within the road reserve that may impede public access, or interfere with road infrastructure, they must apply for a 'works within road reserve' permit.

There are some exemptions, as noted in the Road Management (Works and Infrastructure) Regulations 2015.

Local laws also require property owners to apply for a vehicle crossing permit if they plan to build a driveway. In both cases, a fee applies to cover the costs of the administration and inspection of the work.

LEVELS OF SERVICE

3

Asset Hierarchy

All assets are classified according to a hierarchy that considers the specific function, types of users and user numbers.

Service levels (including inspection frequency, intervention levels and maintenance frequency) are largely based on the respective asset hierarchies. All roads and footpaths within the municipal road network are classified according to a hierarchy that takes into account how they are used, who uses them and how often. The hierarchy classification is used to assist in prioritising inspection, intervention responses and works. Appendices B and C show the Council's hierarchical classification of roads and pathways, along with simplified definitions.

Service Levels for Road Assets

A level of service is the defined service quality for a particular activity or service area (e.g. roads, footpaths or drains) against which service performance can be measured. Levels of service typically relate to quality, reliability, responsiveness, accessibility, safety and cost.

The community levels of service in this plan are outlined below and have been developed from:

- Council's goals and strategies;
- Knowledge of key issues regarding road infrastructure;
- Standards and legislative requirements;
- Performance measures and targets;
- Management of risk;
- Available resources (funding levels, staffing, asset capacity); and
- Customer expectations (based on customer requests, surveys, Councillor feedback etc).

The technical levels of service are the operational or technical measures that are utilised in providing the service. These are detailed within the appendices of the Road Management Plan.

Customer Expectations

Wherever practicable, input will be sought by way of stakeholder engagement. It is important that any decisions are made on the basis of what is deemed to be in the best interest of the community overall while not unreasonably disadvantaging specific groups.

The Council undertakes an annual community survey to determine community views by engaging independent consultants to carry out Community Satisfaction Surveys each year.

Level of Service Review

The level of service will be reviewed at least every four years in conjunction with the review of Road Management Plan. This review includes the opportunity for input from the community.

MANAGEMENT TACTICS

4 Operations & Maintenance Tactics

Council has responsibilities to road users and the community to maintain public roads to a reasonably safe and suitable standard, within our available funds and resources. By developing long-term maintenance programs for our assets, we are better able to plan how we do this.

Reactive and programmed inspections are carried out on the Moorabool road network to identify required remedial work. These inspections are carried out at frequencies outlined in Appendices B and C.

Reactive maintenance tasks are primarily identified through customer requests and are documented in Council's Customer Service Request Management System. These tasks are assessed and responded to according to Council's service standards.

Council maintains a 24-hour callout service, and emergency issues can be actioned accordingly assuming there are not multiple emergencies. Programmed maintenance tasks are identified by a continuous inspection regime, documented and then recorded in a data base. All recorded defects are prioritised and work orders generated for action.

Routine maintenance is carried out according to scheduled works programs. Maintenance budgets are fixed at the start of each year, and routine maintenance schedules may be adjusted depending on the amount of reactive or emergency maintenance required in any one year. The amount of emergency work required due to storms, floods etc. will influence the quantity of routine maintenance work that is completed in any period.

Separate to maintenance inspections, a road and footpath condition audit is typically carried out on the entire network every three to five years to prioritise capital works programs.

Managing Risk

The Moorabool Shire has a risk policy and assessment framework based on AS/NZS ISO 31000:2018 to document known risks and develop management strategies to priorities and mitigate risks for Council work activities and capital projects.

Council uses methodology that incorporates both reactive and programmed inspections and has documented inspection frequencies, intervention levels and response periods that are designed to minimise and manage the overall risk rating. Specific intervention levels and response periods determined by this process are shown in Appendices B and C.

To help mitigate risk to Council, there is generally a 3-step process in place as follows:

The overall Road Management Process is listed in Appendix A.

Noting that there are over 1,463km of road with several thousand intersections, and 236km of footpath, the risk assessment and intervention responses have been developed on a broad scale.

Council investigates all reported footpath tripping/falling incidents. Specific sites identified with a recurring accident trend are assessed for suitability for remedial treatment under a range of Federal, State and Local Government funding programs.

Audit Process

Regular reporting of performance against the standards set out in this Road Management Plan is undertaken, identifying non-compliances and management actions determined in order to address non-conformances.

In addition, the Council's insurers audit the process periodically to verify that Council has a system to inspect and maintain its assets, recording these activities, and retrieving these records.

Duty to Inform Service Provider or Infrastructure Manager

If, in the course of meeting its obligations under this plan, Council will convey to the relevant service provider, works or infrastructure manager if they become aware of any non-road infrastructure:

- are not in the location shown in the relevant records;
- appears to be in an unsafe condition; or
- appears to be in need of repair or maintenance.

Service Authorities with assets within the road reserve include:

- Water (sewer pits, trenches, pipes, water supply valves and underground lines);
- Gas (pits and trenches);
- VicTrack (rail tracks, crossings and signage used by both pedestrians and vehicles);
- Telecommunications (poles, overhead cables, pits and trenches, underground lines);
- Power (poles, overhead electric cables, pits and trenches); and
- The Department of Transport (state road pavements, surfaces, kerb and channel).

Events Beyond the Control of Council

Council will make every endeavour to meet all aspects of its Road Management Plan. However, in the event of natural disasters or multiple emergency events, as well as human factors (such as but not limited to lack of Council staff or suitably qualified contractors), Council reserves the right to suspend compliance with this Road Management Plan entirely or in part.

Council's Chief Executive Officer (CEO) has delegated authority to suspend the plan and will consider such action following a request from the General Manager Community Assets & Infrastructure.

As soon as circumstances allow, the General Manager Community Assets & Infrastructure will recommend to the CEO when the plan should be reactivated, and the CEO will determine whether to do so.

Exceptional Circumstances

Council will make every effort to meet its commitments under its Plan.

However, there may be situations or circumstances that affect Council's business activities to the extent that it cannot deliver on the service levels of the Plan. These include but are not limited to: natural disasters, such as fires, floods, or storms, or a prolonged labour or resource shortage, due to a need to commit or redeploy Council staff and/or equipment elsewhere or due to the effects of pandemic and or government intervention.

Suspension of the Plan

In the event that the CEO of Council has considered the impact of such an event on the limited financial resources of Council and its other conflicting priorities, and determined that the Plan cannot be met, then pursuant to Section 83 of the Wrongs Act 1958, the CEO will write to Council's Officer in charge of the Plan and inform them that some, or all, of the timeframes and responses in Council's Plan are to be suspended.

Reinstatement of the Plan

Once the scope of the event/s have been determined, and the resources committed to the event response have been identified, then there will be an ongoing consultation between Council's CEO and Council's Officer responsible for the Plan, to determine which parts of Council's Plan are to be reactivated and when.

Communication and documentation around Plan suspension

Council will provide information/statements to residents about the suspension or reduction of the services under its Plan, including:

- How the work that will be done has been prioritised; and
- The period for which it is likely to be affected.

This information will be provided by Council on its website where its Plan is located and other channels as appropriate such as press releases or social media.

Where Council has suspended, in part or whole, it's Plan, associated documents (e.g. communications, meeting minutes, schedules, etc.) will be recorded and stored.

Inspections and repairs during suspension of Plan

The suspension of the Plan will not necessarily mean that all inspections and repairs halt. However, it may mean that only certain categories of inspections and repairs are undertaken.

These will be based on a risk assessment and resources available to Council, taking into account the resources needed to address the impact of the trigger event. For example, some reactive inspections may take place and repair (temporary or permanent) of roads/footpaths which pose a high risk may be undertaken, depending on the resources available to Council and the accessibility of each asset.

Responsibility for the Plan

Overall responsibility for administering and implementing the Plan rests with the CEO.

Emergency Response & Temporary Repair

Emergency response are works that need to be undertaken outside the routine works programs to ensure the safety of road users and the public as a result of an emergency incident.

Emergency works include traffic incident management, response to fires, floods, storms and chemical spillages, and assistance required under the Victorian State Emergency Response Plan and Municipal Emergency Management Plan.

Temporary works are undertaken to reduce the risk of an incident until such time as routine maintenance can be completed. Response times and measures (warning signs, flashing lights, speed reduction, safety barriers) are typically as soon as practicable and is determined based on the risk to safety and the type, volume and nature of road usage.

REVIEWING THE PLAN

5

Plan Review

A formal review, in accordance with sections 303 and 304 of the Road Management (General) Regulations 2005, will be conducted every four years in line with Council elections and the associated registers will be reviewed and updated on an ongoing basis.

Amendment of the Road Management Plan

Unless required as a result of a significant change in budget allocations for road and footpath maintenance this Road Management Plan will not be amended during the life of the Plan.

Any revision of the Plan would be subject to the consultation and approval processes as detailed in Section 54 of the Road Management Act.

Delegation

The General Manager Community Assets & Infrastructure is empowered under delegation to amend the Register of Public Roads and Register of Public Paths associated with this plan.

REFERENCES

6 Supporting Documents & Technical References

The following supporting documents and technical references, whilst complimenting the Plan do not form part of this Plan. All supporting documents may change from time to time to reflect changes in Council policy, legislative changes, operational changes or as a result of audit findings.

Supporting documents are not available for inspection but most may be downloaded from the relevant State Government, Council or organisation web sites:

- Risk Management Standard, AS/NZS ISO 31000:2018
- International Infrastructure Management Manual (IIMM) 2011, IPWEA

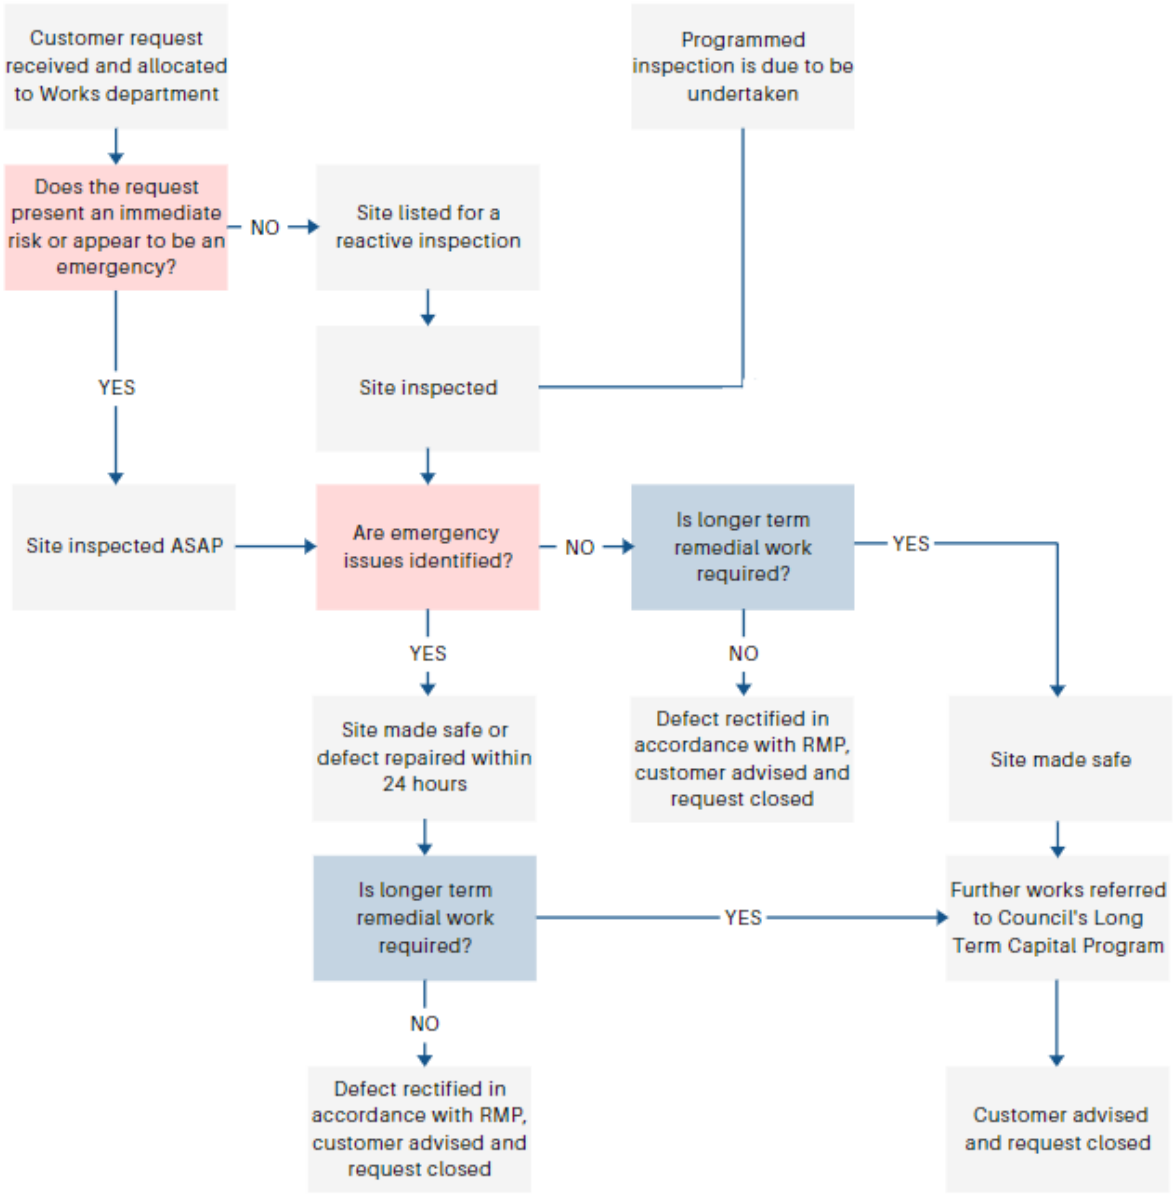
Appendix A

Road Management System Process Map



Appendix B

Hierarchy, Inspections & Intervention Levels

Table B.1 Road Hierarchy Definitions

	CODE	HIERARCHY	DESCRIPTION		
			Purpose & Use	IDM/Planning Scheme Reference	Typical Traffic Volume
URBAN AREAS	C	Collector	Provides a strategic link between arterial roads, suburbs, commercial areas, major housing areas or to a defined destination. Provides access to tourist facilities or industrial centres and may include regional links and provides a primary connection into residential areas.	Connector Street Level 1 & 2	> 2,500 v/d
	A1	Access Level 1	Provides access to local residences or secondary access to commercial areas.	Access Street Level 1 or 2	300 – 2,500 v/d
	A2	Access Level 2	Provides access and secondary access to local residences and properties.	Access Place or Access Lane	< 300
	U	Unsealed	Provides access to local residences and properties.	N/A	< 100
RURAL AREAS	C	Collector	Provides a strategic link between, or to, defined townships, districts, tourist facilities, industrial centres and may include regional links. Roads may experience high use of heavy vehicles (eg. trucks, busses, etc).	N/A	> 500 v/d
	A1	Access Level 1	Provides access to local residences and properties.	N/A	150 – 500 v/d
	A2	Access Level 2	Provides access to local residences and properties.	N/A	< 150 v/d
	U	Unsealed	Provides access to local residences and properties.	N/A	< 100

Table B.2 Path Hierarchy Definitions

CODE	HIERARCHY	DESCRIPTION
P1	High Use	Footpaths serving the retail and commercial areas of urban town centres and footpaths that serve other medium density pedestrian attractors such as those within the first block away from major commercial areas, or those in close proximity to schools, railways stations or other pedestrian generators.
P2	Medium Use	Footpaths and shared paths in urban areas linking to railway stations, bus stops, schools, commercial or community facilities or other pedestrian generators. This category also includes footpaths around or serving Council's corporate buildings (offices, works depots, child care centres etc).
P3	Low Use	Footpaths providing access within residential areas or paths in rural areas and townships. Typically these will be along Access Level 1 and Access Level 2 roads.
P4	Recreational Trails	These include recreation or exercise walking tracks, typically linking the residential areas with reserves, river banks or other scenic areas, or are paths within recreation reserves and often have unsealed surfaces.

Table B.3 Road Inspection Types & Frequency

		INSPECTIONFREQUENCY (by road category) D = weekday, M = month, Y = year			
INSPECTION TYPE		C	A1	A2	U
PROACTIVE	Urban	Not exceeding 3M	Not exceeding 12M	Not exceeding 12M	Not exceeding 6M
	Rural	Not exceeding 3M	Not exceeding 6M	Not exceeding 6M	Not exceeding 6M
REACTIVE	Interim inspection as a result of notification or Customer Request	Not exceeding 5D	Not exceeding 5D	Not exceeding 10D	Not exceeding 10D

Table B.4 Pathway Inspection Types & Frequency

		INSPECTIONFREQUENCY (by path category) D = weekday, M = month, Y = year			
INSPECTION TYPE		P1	P2	P3	P4
PROACTIVE	Programmed hazard and maintenance inspection	Not exceeding 3M	Not exceeding 6M	Not exceeding 12M	Not exceeding 12M
REACTIVE	Interim inspection as a result of notification or Customer Request	Not exceeding 2D	Not exceeding 5D	Not exceeding 5D	Not exceeding 5D

Proactive Inspection

Regular timetabled inspections that are scheduled depending on traffic flow, the types of defects likely to impact the asset and the perceived risks of these defects.

These inspections assess the road for the presence of defects that have reached the intervention level as defined in Table B.3. Programmed inspections must be recorded for all road assets regardless of the identification of a defect or not. A visual inspection from a vehicle is undertaken for roads, and on foot for paths, in order to identify defects.

Reactive Inspection

These are undertaken following notification to council of defects and safety issues. The inspection involves an assessment of the reported defect to determine if it has reached intervention level as defined in Table B.3 and to determine whether a maintenance response is required.

Inspection Frequency

This is the frequency of inspections to identify defects. The nominated time is not precise and a 10% margin is allowable. Where the required frequency would result in the inspection falling on a day other than a weekday (any day other than Saturday or Sunday, or a Public Holiday), the inspection may be undertaken on the first following weekday.

Table B.5 Intervention Levels & Response Time

	RESPONSE TIME D = weekday, M = month, Y = year			
DEFECT TYPE (ROADS)	C	A1	A2	U
OBSTRUCTIONS AND SUBSTANCES IN TRAFFIC LANES				
Where water is encroaching road at a depth >50mm and >1m wide over 1.2m distance.	6M	9M	9M	9M
Materials fallen from vehicles, fallen trees, dead animals, hazardous or slippery materials on the traffic lane.	1W	1W	1W	1W
PAVEMENTS OR SURFACE DEFECTS				
Potholes in the traffic lane of a sealed pavement, where the pothole is >75mm in depth and/or >300mm in diameter.	1M	3M	3M	-
Potholes in the shoulder of a sealed pavement (with a seal width of <5m), where the pothole is >150mm in depth and/or >500mm in diameter.	-	3M	6M	-
Edge drops onto unsealed shoulder >100mm over a 10m or greater length..	3M	6M	6M	-
Potholes in the traffic lane of an unsealed pavement, where the pothole is >150mm in depth and/or >500mm in diameter.	-	-	-	9M
Isolated pavement deformations or scour >150mm, under a 3m straight edge.	3M	6M	12M	12M
Edge break that is >300mm laterally, is >75mm in depth and over a 5m length from the nominated seal line.	3M	6M	6M	-
Corrugations measuring >30mm in depth and >30m in length.	-	-	-	6M
DRAINAGE				
Where the table drain is not free flowing or a lip on the edge of the pavement or shoulder is >100mm high.	6M	12M	12M	12M
Damaged or missing drainage pit lid, surround or grate in a traffic lane.	1M	3M	3M	6M
Vertical or horizontal displacement of kerb and channel of >100mm on the edge of a traffic lane.	6M	12M	12M	-
ROADSIDE				
VEGETATION				
Trees or tree limbs that are in immediate likelihood of falling on the roadway.	1M	1M	1M	1M
Roadside Vegetation Overhead clearance, Vegetation intruding into the road envelope: <5.0 m clearance over the trafficable portion of the road.	12M	24M	24M	24M
Vegetation that has grown to restrict the safe sight distance at intersections or viewing of hazard, warning or regulatory signage.	3M	6M	6M	6M
ROADSIDE FURNITURE				
Hazard, warning or regulatory signage that is missing, illegible, damaged or misleading, making them substantially ineffective.	1M	3M	3M	3M
Guideposts that are missing or damaged, making them substantially ineffective.	3M	6M	12M	6M
Safety barriers, bridge barriers or fencing that is missing or damaged, making it substantially ineffective.	6M	12M	12M	12M
Pavement markings that are missing, illegible or misleading, making it substantially ineffective.	12M	12M	12M	-
Structures (bridges, culverts, retaining walls, light poles or other structures) having visible damage likely to affect road user or public safety.	1M	3M	3M	3M

INSPECTION TYPE (PATHS)	P1	P2	P3	P4
FOOTPATHS & SHARED USER PATHS				
Sealed paths and shared paths having a vertical step >25mm.	1M	2M	2M	2M
Unsealed paths and shared paths having a vertical step or pothole >50mm in depth.	-	2M	6M	6M
Vegetation clearance <2.5m in height or encroaching over the path edge or through the path surface.	3M	3M	12M	12M
Damage or missing drainage pit lid.	1M	2M	2M	3M

Response Time

This is the time allowed to respond to a hazard, which is based on consideration of the hazard type and severity. Response time is measured from the time that the hazard is identified by, or notified to, Moorabool Shire Council. The nominated time is not precise and a 10% margin is allowable.

Appropriate Warning

Where, because of the nature of the work required, level of resources required or workload, it is not feasible to rectify a hazard within the time shown within Table B.3, appropriate warning of the hazard is to be provided until a suitable repair or treatment can be completed. Appropriate warning may include, but is not limited to the following:

- Provision of warning signage.
- Traffic control action.
- Diverting traffic around the site.
- Installation of temporary speed limits.
- Lane closures.
- Closure of the road to use by certain vehicles (eg. a load limit).
- Road closures.
